Expect More From Your Mantel

Pictured above: Rustic Barn Wood-Brown with Decorative Extension Brackets
Enhance the aesthetics of any room by finishing your Mendota fireplace with a non-combustible concrete mantel and surround from MagraHearth. Inspired from the inherent beauty of century-old barns and structures, MagraHearth Mantels look like authentic wood or stone but are designed to withstand the heat of your fireplace. MagraHearth Mantels are meticulously handcrafted using patented, lightweight concrete to replicate the look of reclaimed wood and stone. Industry first, non-combustible mantels are designed to divert heat away from TVs, electronics or artwork that sit above the fireplace so mantels can be installed lower and closer to the fireplace than their real-life counterparts.

**Add A Distinctive Mantel or Mantel Shelf To Your Fireplace**

**Surround Your Fireplace With The Natural Beauty Of Wood Or Stone**

From Rustic Barn Wood to Chiseled Stone, choose the colors and textures that complement your décor.

- Rustic Barn Wood-Brown with Decorative Extension Brackets RBW-5-BRN (AA-11-02327) with BRKTS2-BLK (AA-11-03060)

A perfect combination of handcrafted textures, colors and woodgrains replicate every last detail of authentic wood.
Create Your Custom Finish

With the look of authentic stone or wood, MagraHearth non-combustible concrete mantels and surrounds can be installed lower and closer to the fireplace than their real-life counterparts. That gives you the flexibility you need, with no “mantel clearance” concerns for artwork or wall-mounted televisions. Thanks to MagraHearth, you can bring any fireplace installation to a beautiful, custom finish.
