

## Transforming Communities

World Outreach Ministry Foundation helps transform communities by identifying their greatest needs and supporting leaders. WOMF's mission supports local leadership, who will then lead their people to succeed and thrive.

### COMMUNITIES

When WOMF hears of a need, the next step is to assess the impact it will have on its community. Each need is evaluated for its greatest potential, how it can be sustained, and what it will bring for each individual within that village.

### LEADERSHIP

WOMF identifies proven and emerging leaders. There may already be an established church, or we may assist in planting a church to validate leadership. We look for leaders who are trusted by the locals and have a community-building mindset.

### IDENTIFY NEED

Needs can be formidable and varied. WOMF looks to partner with local leaders to identify the greatest needs. Some ways WOMF can help is by educating and equipping leaders to establish a clean water source, build schools and/or training centers.

### FULFILL & SUSTAIN

WOMF works with leaders and donors to define each project and oversee its completion. We set goals and milestones for every phase. WOMF is accountable to donors and to the communities we serve. Our focus is to follow through, get needs met, complete work, and see each community flourish.
