MEET THE CREATOR

As a first-generation Asian-Canadian, my upbringing was extremely different from many of my peers, and because of my cultural differences and family ideals, generational wealth felt extremely out of reach. My emotional intelligence was non-existent, my communication skills sucked and my money mindset was horrible.

My family did the best with what they had but it wasn't enough to set me up to build Generational Wealth for myself. Finally, I looked to the future and realized that I was following the same harmful patterns I grew up with. I decided to learn and grow.

I became a Neuro-Linguistic Programming Master Practitioner and Clinical Hypnotherapist and immersed myself (aka: Geeked Out!) into learning about the subconscious mind and subconscious reprogramming. This also led me to learn about Generational Trauma and how it affects.
