

Laurel Avenue KITCHEN

LISA OBERST DESIGN

At the heart of the home, the kitchen serves as a warm and welcoming gathering place, designed with both beauty and intention. The island is crowned with book-matched quartzite slabs whose perfectly aligned veining forms a striking butterfly pattern in the center...an artful centerpiece created from carefully selected sequential stone slabs. Overhead, substantial brass Ralph Lauren lanterns bathe the room in a soft, dappled glow, casting elegant shadows that shift throughout the day. Flanking the Thermador dual-fuel range, True brand refrigerator and freezer create a sense of balance and symmetry, reinforcing the kitchen's harmonious design. Glass-front upper cabinetry offers a curated glimpse of the homeowners' dishware, adding a touch of refinement and warmth to this sophisticated yet inviting space.
