

Laurel Avenue DAUGHTER'S BEDROOM

LISA OBERST DESIGN

The daughter's room was designed with a sense of warmth and gentle enchantment—sophisticated yet inviting, with layered textures that create a polished, comforting feel. A dramatic custom-paneled wallpaper featuring an oversized dandelion motif spans the north-facing wall, its vertical orientation adding both height and artistry to the space. The closet was thoughtfully built in to support a more utilitarian organizational system, infused with a tailored, custom touch to keep the room feeling refined and orderly. Flanking the bed, sumptuous leather-wrapped nightstands bring a luxurious tactile element, each topped with an oversized urn lamp that casts a soft, welcoming glow. The result is a serene and beautifully composed bedroom that balances charm, elegance, and functionality.
