

## *Laurel Avenue* EXTERIOR ELEMENTS

LISA OBERST DESIGN

Where many homes push to occupy every possible square foot of the lot, this residence takes an entirely different approach - one rooted in restraint and intention. The entry sequence was designed to create an experience, inviting visitors to slow their pace as they move up the front walk. In view along the path sits an antique trough water feature, its soft trickle setting a tone of serenity before you even reach the doorstep. At the entry, custom inlaid mosaic address numbers lend a touch of artistry and welcome, guiding guests toward the muted pink double doors that open into the heart of the home. As you enter, you are greeted with a beautiful multi-panel custom floral wall covering inlaid between custom millwork paneling.

- Front door paint: Dunn Edwards Traveling Tan
