# THE VALUE OF WEDDING VIDEOS

We all know that wedding photography is a *must*. In the past, wedding videography has been seen as more of a “luxury”, but in recent years, it’s become more essential to include it in your wedding budget for several important reasons:

## VIDEO CAPTURES WHAT STILL PHOTOS CAN’T

Photography captures all of the formal, timeless images you need to have from your wedding day – posed portraits of the two of you that you can hang up on your wall, photos with your bridal party, and family portraits you can share with future generations.

But there are several things photography can’t capture that only video can. Still photographs can’t capture audio, mannerisms, and motion. A video allows you to see your dad’s lip quivering as he walks you down the aisle, tears well up in your partner’s eyes the first time they see you on your wedding day, your interactions with each other as you’re taking portraits, your veil blowing in the wind, or a slow motion kiss.

A video will remind you of all the sentimental things that were said on your wedding day. You’ll be able to hear your voices crack as you read letters from each other, the applause from your guests when you’re officially pronounced married, the tears as you say your vows, and the laughter during the reception speeches.

## AN EXTRA SET OF EYES AND EARS

No matter how much you try to be “present” on your wedding day, there will inevitably be moments you aren’t able to witness. Our job is to capture all of those real, candid moments that you might have missed (or forgot even happened!) so you can relive every special moment of your wedding day for years to come.

## ABSENT LOVED ONES

Hopefully you are able to have as many of your loved ones, family members, and friends with you on your wedding day, but unfortunately, things do happen. Maybe you have family overseas, a relative is in the hospital, or maybe you had to cut your guest list short because of venue restrictions. Having a wedding video will allow you to share it with loved ones wherever they are in the world so they can watch it and experience the entire day as if they were there in person.

## WEDDING VIDEOS AREN'T WHAT THEY USED TO BE

When you first think of a wedding video, you may think of the painfully long wedding videos from the 1980s, with 2+ hours of unedited footage. Modern wedding videos are much more curated and artistic. The most popular option is a highlight video, which is a 5-8 minute video that combines edited footage, music, and the best audio clips from the day, so you can relive all your favorite memories in a “short and sweet” video.

## Lin Pernille Kristensen

Photographer & Videographer

Lin Pernille LLC

I fell in love with wedding photography & video when I shot my first wedding at 18 years old. When I was 20 years old, during my junior year in college, I knew that I had found my passion and decided to incorporate my photography business. Since then, I have been lucky enough to capture countless weddings of a wide variety of cultures and styles. I'm very grateful to be able to do what I love and I can't wait to share more special days with more unique couples!

There's no greater honor than to be able to photograph a couple's happiest day, and for that reason I take my job very seriously. I will always strive to capture the mood, style, and all the important moments to the best of my abilities, while being attentive yet unobtrusive, and making the couple feel comfortable and calm throughout the whole day. Please feel free to contact me and I'll be happy to answer any questions or help you plan & book your wedding!
