

Position: **Computer Science and Digital Literacy Teacher**

Department(s): Education

Reports to Principal

SUMMARY - Lititz Christian School is seeking a Part-Time Computer Science Teacher to serve students in grades 7–10, with the potential to develop and teach additional high school elective courses. This individual will create an engaging, Christ-centered learning environment where students develop critical technology skills, problem-solving abilities, and digital literacy including a focus on the responsible use of artificial intelligence (AI).

Instruction will be aligned with the Pennsylvania Department of Education academic standards and designed to foster curiosity, creativity, and real-world application. The ideal candidate will cultivate a student-led classroom that encourages exploration, innovation, and responsible use of technology through a biblical worldview.

ROLES AND RESPONSIBILITIES

- Develop and implement engaging, standards-aligned technology lessons for students in grades 7–10.
- Model and integrate biblical principles, encouraging students to use technology ethically and responsibly.
- Create a student-centered, inquiry-based learning environment that promotes curiosity, creativity, and problem-solving.
- Teach foundational and intermediate technology skills, which may include digital literacy, coding, computational thinking, and responsible technology use.
- Provide opportunities for project-based learning, allowing students to design, build, and solve real-world problems.
- Encourage critical thinking and collaboration through hands-on activities and student-driven projects.
- Maintain a classroom environment that supports exploration, innovation, and respectful digital citizenship.
- Assess student progress through projects, presentations, and performance-based tasks.
- Stay current with emerging technologies and integrate relevant tools into instruction.
- Collaborate with faculty to support cross-curricular integration of technology.
- Oversight of Robotics Club in high school

QUALIFICATIONS

- Demonstrates a personal commitment to Jesus Christ and actively participates in a local church, supporting the mission and values of the school and integrating a biblical worldview into teaching.
- Bachelor's degree in Education with a concentration in Computer Science or related field required.
- Willing to pursue certification from Association of Christian Schools International
- Experience teaching middle or high school students preferred.
- Strong understanding of technology instruction, digital tools, and current educational technology practices.
- Ability to create engaging, student-led, and project-based learning experiences.
- Excellent communication and classroom management skills.
- Flexibility to develop and expand course offerings, including potential high school electives.
- A passion for Christian education and integrating faith with learning.
