JOB CARD MANAGEMENT

Inventory ordering and management made easy with the BOAhub Jobbing Feature.

Automatically pushes stock used on job cards to the cart for reordering.

Have confidence your inventory is being taken out of stock, invoiced, and restocked.

Easily create job cards, track inventory use, and send a PDF for invoicing on the go with the BOAhub's new Jobbing module.

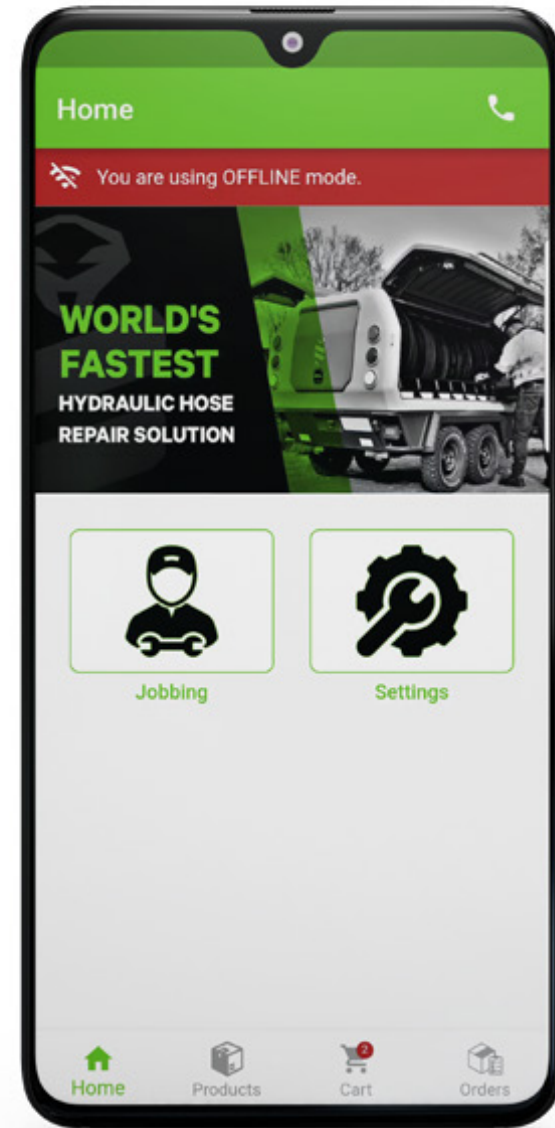

OFFLINE FEATURE

We understand the industries we service are commonly situated in remote locations, where phone coverage is limited or non-existent. The BOAhub Offline feature allows users to continue using the key features of the BOAhub while offline.

This includes:

- Creating and managing job cards
- Creating hose assemblies
- Assigning hoses to assets
- Adding stock to cart for reordering.

HOSE MAKER

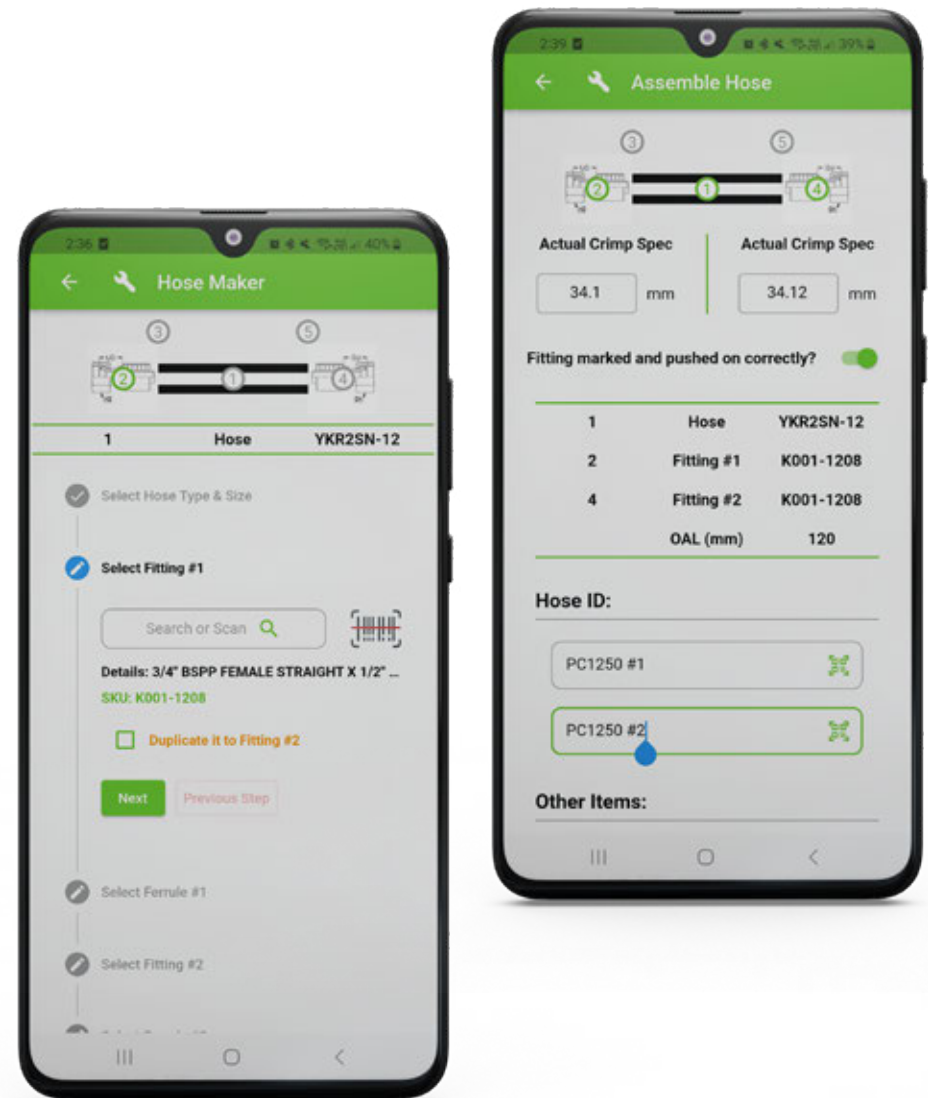

Within the BOAhub Jobbing Feature, you have the ability to attach hose assemblies to the Job Card.

To add a Hose Assembly simply follow the simple step-by-step process, using the barcode scanner to easily add the components of the hose assembly.

To ensure quality, you can record the crimp specs of the hose assembly and tick a box to ensure you have put the ferrule correctly on the hose end.

You also have the ability to assign it to a position on the asset.

All this data is presented in a PDF when you complete the Job Card.

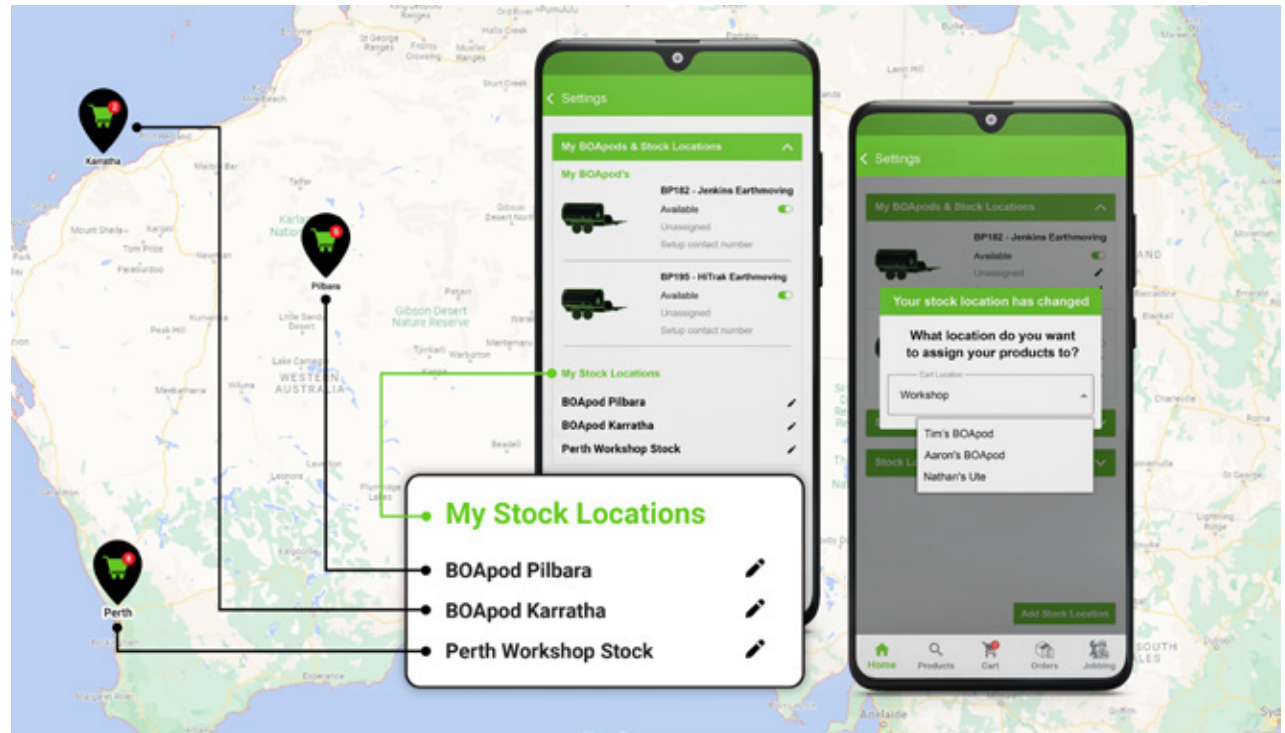

MULTI-CART LOCATION

To handle stock in multiple locations we created the game-changing Multi Cart Location feature. Whether it is multiple hydraulic hose repair units or workshops, this feature helps organize your stock movement.

This features allows you to:

- Efficiently handle multiple stock locations.
- Assign employees to specific carts.
- Add products to the cart that correspond to the stock location.

SCAN TO ORDER

The BOAhub Hydraulic Hose Management system is tightly integrated with the BOApod, allowing users to seamlessly reorder product used with the Scan to Reorder feature.

Our part cabinets within the BOApod are barcoded. Simply go into the BOAhub, scan the barcode, and click order.

This feature increases efficiencies, removing paper, and ensuring inventory management is easy as possible. Because no one wants to get to a breakdown to find they don't have the stock to carry out the hose repair.

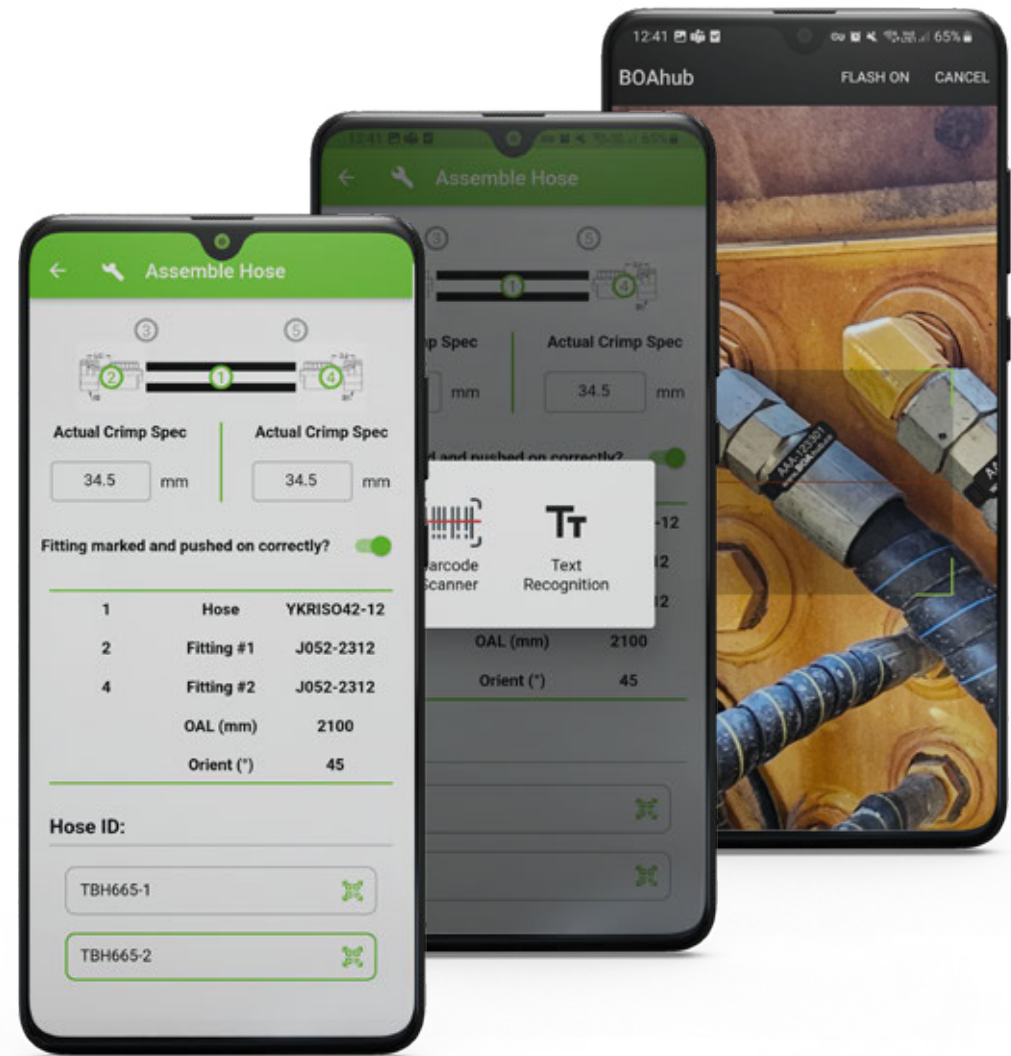

HOSE TAG SYSTEM

Introducing our game-changing feature for those managing hydraulic hose repairs onsite!

With just a simple tag, track the entire history of your hose assembly -from components to hose assembler, date to job details.

Say goodbye to guesswork and unaccountability. Elevate your hose management with the BOAhub Hydraulic Hose Management System –delivering traceable & transparent hydraulic hose repairs onsite.

MY COMPANY LOGO

My Company Logo feature allows you too effortlessly incorporate your logo to your Job Card PDF', increasing your brand identity and showing professionalism with every document sent via the BOAhub.

Make your BOAhub documents your own.

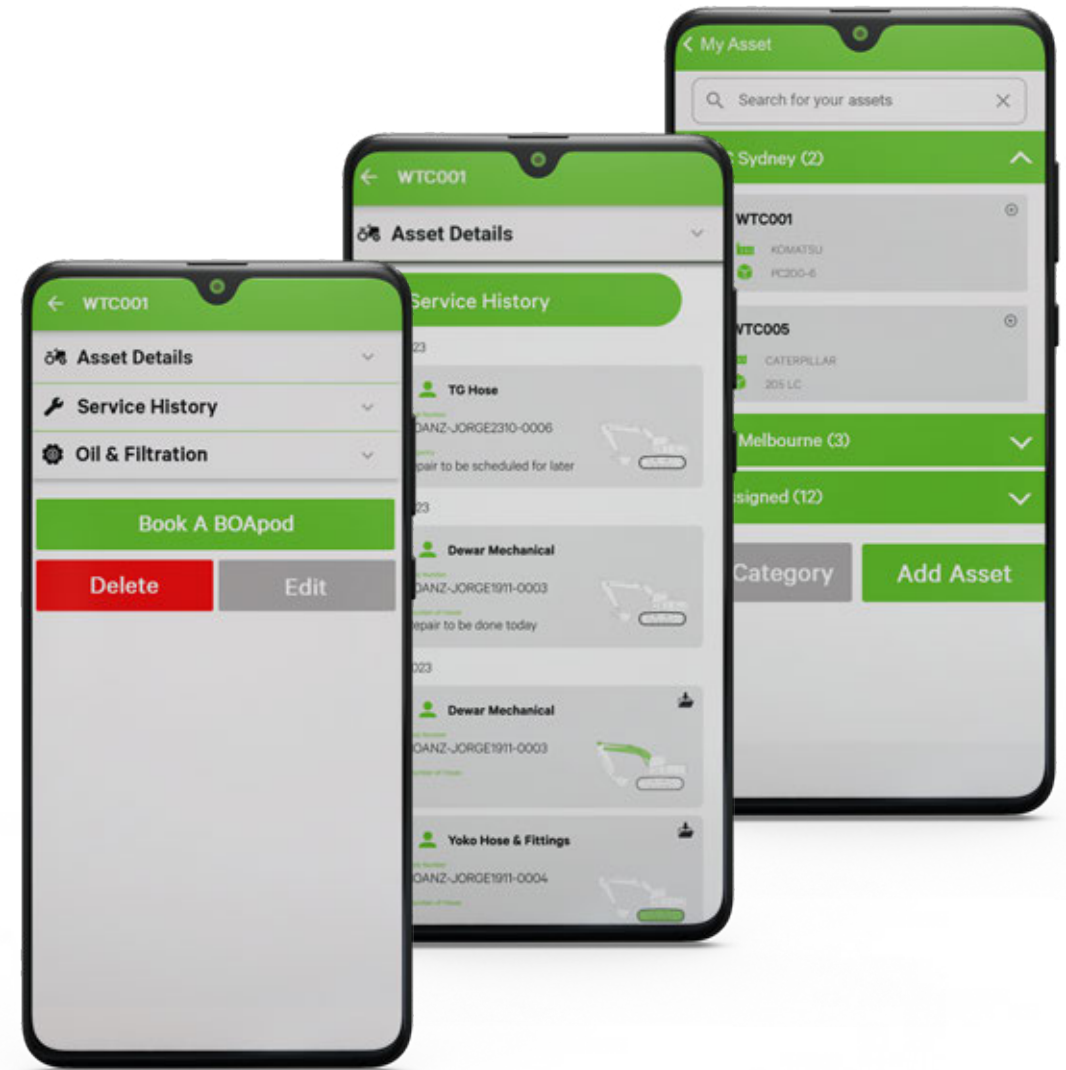

MY ASSETS

Schedule repairs efficiently with a single click, minimizing downtime and administrative hassle.

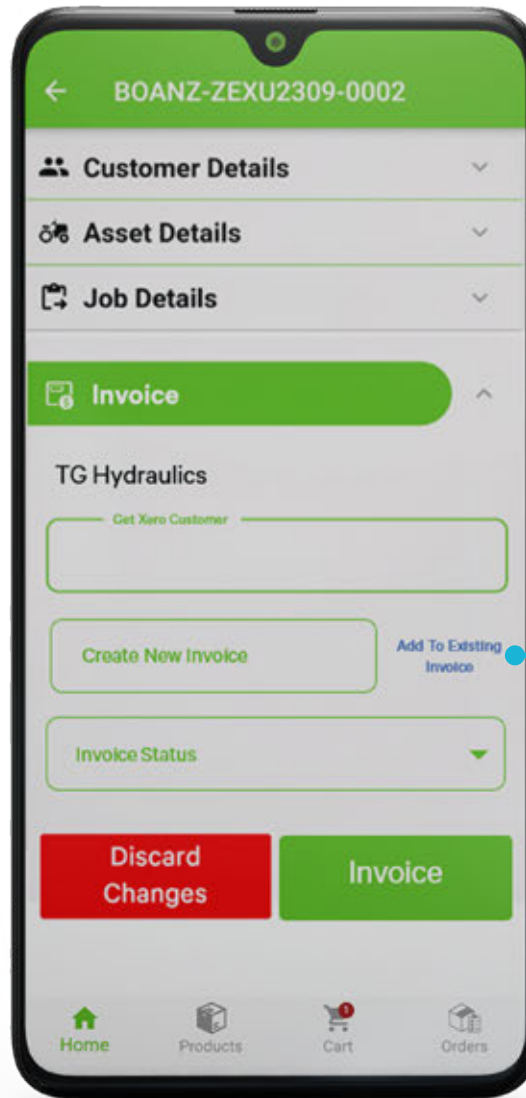

All asset data stored digitally in one place for quick access and easy management, saving you time searching for information.

Seamless integration of asset information and repair scheduling, boost operational workflow and reduces labour costs.

XERO INTEGRATION

The BOAhub Hose Management System seamlessly integrates with Xero's accounting software.

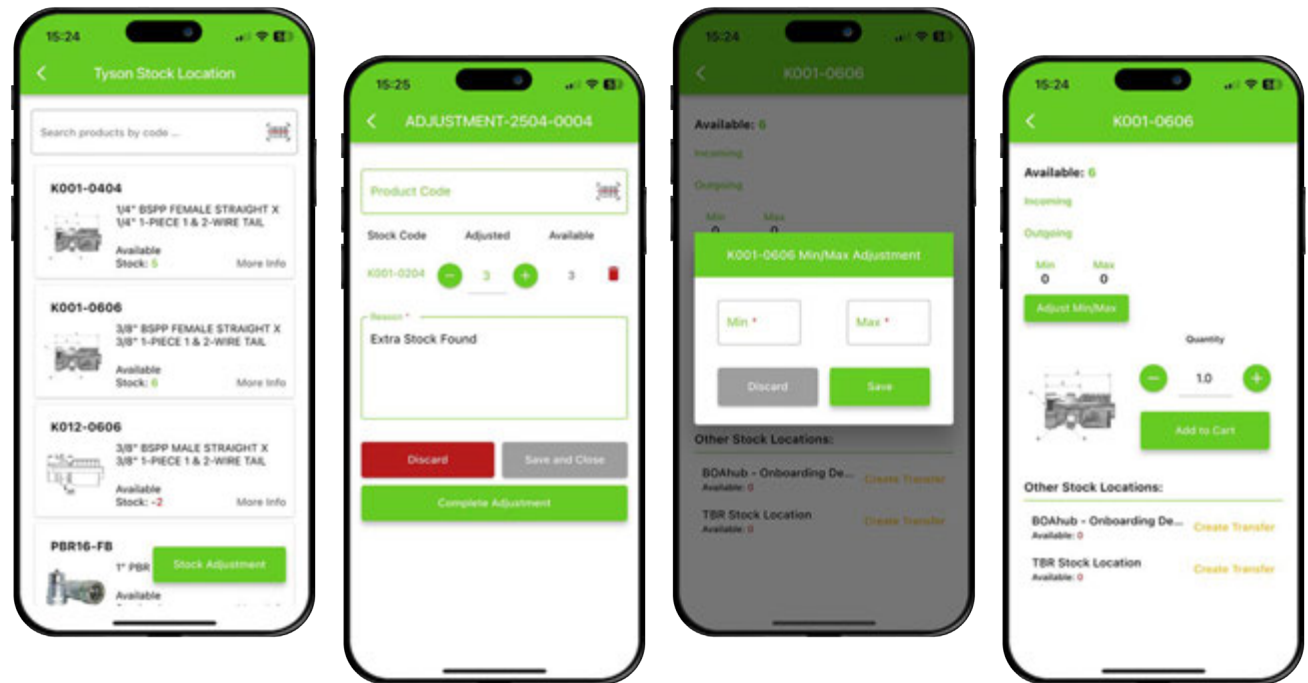

ADVANCED INVENTORY MANAGEMENT

Take control of your stock with BOAhub's Advanced Inventory Management.

Seamlessly track multiple stock locations, ensuring the right products are always on hand.

Automate product additions, streamline ordering with easy scanning and bulk management, and maintain accurate order histories with detailed insights.

Smarter inventory control means less downtime and more efficiency.

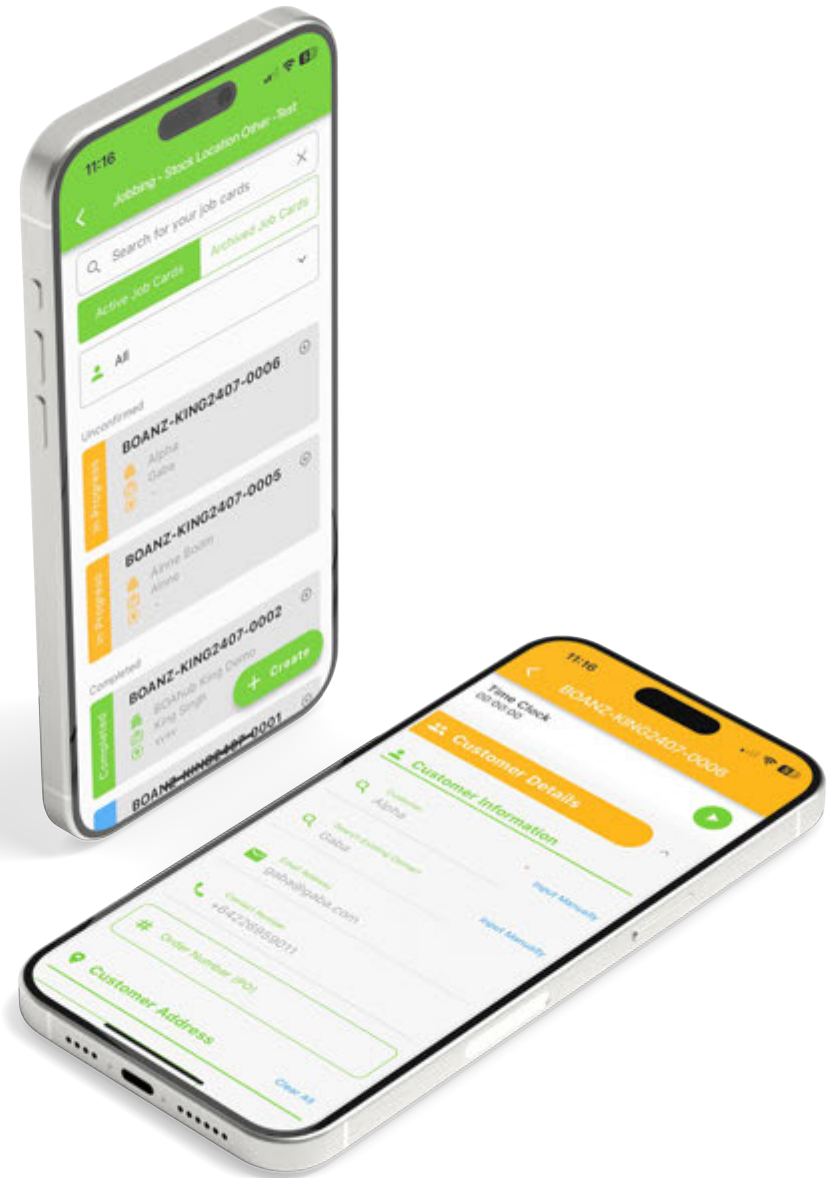

QUOTE MANAGEMENT

Easily create and manage quotes within BOAhub in just minutes.

Access pricing, parts, and customer details effortlessly to streamline your workflow.

Convert quotes to jobs seamlessly, keeping your operations efficient and organized.

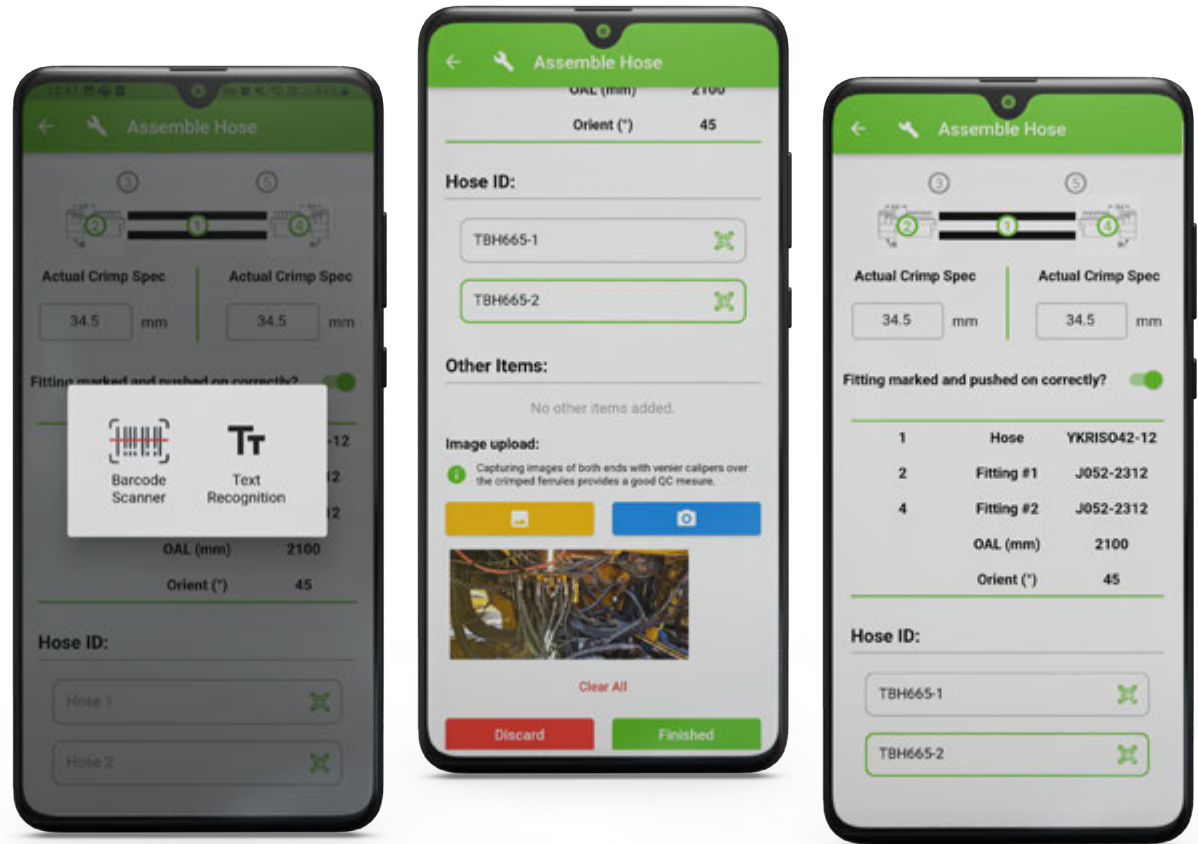

COMPLIANCE

Stay on top of compliance with BOAhub.

Track maintenance history, manage inventory, and ensure quality control—all in one place.

Simplify compliance, reduce admin time, and keep your operations running safely and efficiently.

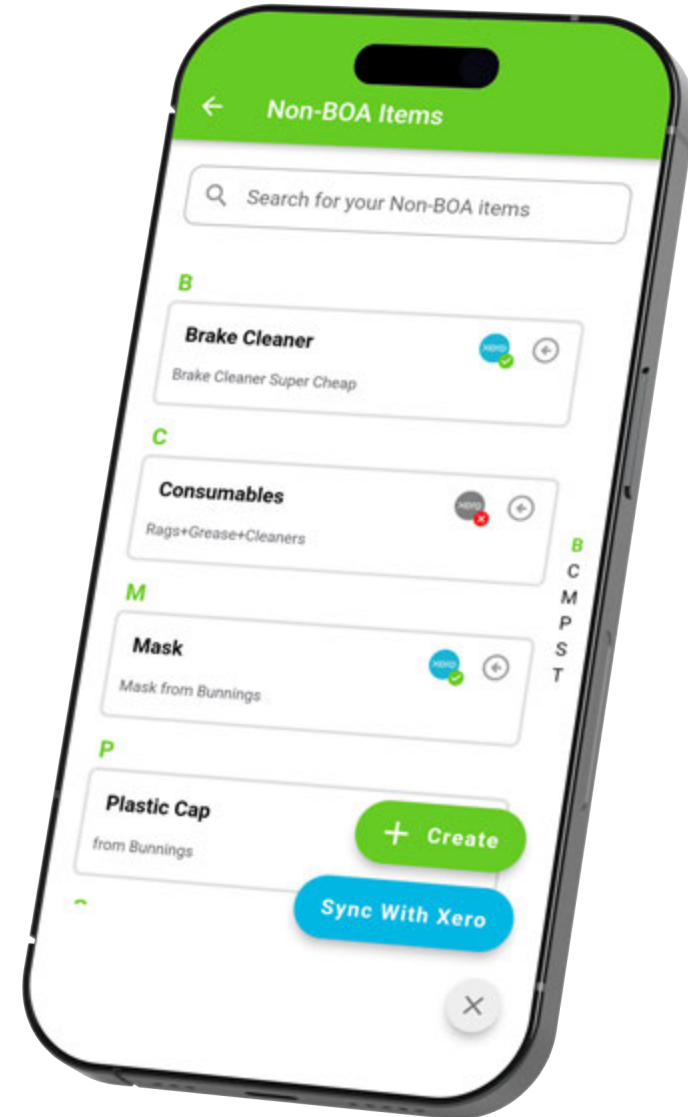

NON-BOA ITEMS

Easily manage products outside BOA-supplied product– like filters and seals to rams and more. The Non-BOA Items feature lets you save, price, and add third-party products directly within your job cards.

Upload product files, add supplier notes, and set your buy and sell prices – all in one place. Also have the ability to integrate your products with Xero, seamlessly connecting your Xero products with your products within Non-BOA Items.

Perfect for managing the full scope of your service offering, even when it's not a BOA part.
