2859

This base package works for brides who especially love my work but find my other packages slightly out of reach under tighter budgets.

Of course, packages and pricing alone doesn't give you the full story. I go above and beyond for my couples in a way that distinguishes me from other videographers.

The Experience

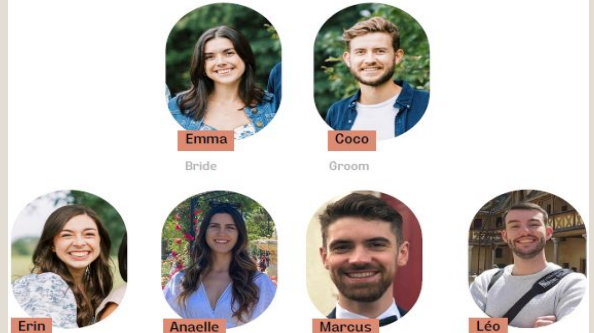

Meet-up IRL

Once we're booked, I love to meet in person for a relaxed coffee chat. It helps me understand who you are as a couple and helps you feel completely at ease on the wedding day.

Family Familiarity

Wedding Party

Before the wedding, I ask couples to share family photos with names. Knowing who's who allows me to connect naturally with your loved ones and document the day like a familiar face

Timeline & Walk-through

Joining couples for their final venue walk-through and reviewing the timeline together allows me to anticipate logistics, camera placement, sound, and coordination so everything flows smoothly.

Drone Footage

Whenever possible, I capture drone footage of the venue on a separate day. This ensures the best light, fewer distractions, and the most cinematic results while respecting venue guidelines
