

# How to prepare for your Engagement Session

## Location

Between you and your photographer you can decide on the best location: where he proposed first date etc.,,,,

## Splurge

Make-up, nails, hair and your outfit. You owe it to yourself. Getting all dolled up and having professional photos with your sweetheart is not something you do everyday. Get your ring cleaned as images will be captured of your ring.

Bonus Tips: False lashes look great in photos.

## Your Outfits

After you've picked your location deciding on your outfit(s) gets a little easier...depending on your session time two outfits gives variety. My recommendation is to coordinate and not match outfits and avoid patterns

## Relax

There is nothing to be nervous about!!! really!!!! Your photographer will guide you through your poses by the time your session is complete you'll feel like a model

## Go on a date!!!!!!

Ok your session is over your looking and feeling great!! now what??

Go on a date, go to a nice restaurant and make your whole day a date night !!
