QUANTUM BOTANICALS

Online Course

The Quantum Botanical online diploma course offers a loving and mind expanding exploration of the plant world, the nature of consciousness and quantum physics, opening your heart and mind in profound ways that will change the way you perceive healing, personal evolution and the patient-practitioner relationship.

Journey through more than 100 years of scientific discovery that has experimentally and clinically proven that consciousness precedes matter, that thoughts and emotions initiate molecular/biological function and that the fundamental nature of matter is vibrational.

This study is philosophically explored alongside ancient systems of plant medicine and man's evolution within the field of plant consciousness.

The course goes on to explore the fractal relationship between consciousness, the mental, emotional and physical body, and the plant world, offering profound, practical approaches to initiate healing (new emergent behaviors) with resonant plant frequencies.

Learn to apply the fundamental of vibrational medicine through heart-brain coherence, right-hemisphere processing and healing processes combined with the therapeutic use of flower essences and essential oils. The 38 Bach Flower Essences are explored in-depth, as is elemental energetics.

Learn how to cleanse receptor sites on cells, erase incorrect information from cellular memory/DNA and restore correct information

with essential oil chemistry. This approach releases trauma held in the body, allowing for clearer perception and more peaceful, present approach to life. Trauma lives on in genes through generations if information isn't erased and reprogrammed. The Quantum Botanicals online course provides numerous approaches to heal our relationship with the past, and increase our awareness and clarity in the present, providing the foundation for the journey of individuation and evolution of consciousness.

We also offer the Quantum Botanicals Advanced diploma course for those who wish to integrate diet and herbal medicine for the complete system of Quantum Botanicals that we teach.

IRIDOLOGY

Online Course

School of Natural Medicine UK offers one of the most comprehensive Iridology course in the world. Written by Farida Sharan ND, a leading pioneer of Iridology and author of the classic textbook 'Iridology - A Complete Guide,' 'Dictionary of Iridology,' and 'Iridology Colouring Book,' This course will provide you with the knowledge needed to guide effective holistic health programs.

Iridology is a form of analysis that examines the iris structure, iris markings and colours, and what is known as 'iris constitutional type,' to determine ageing pathways in the body.

Iridology does not diagnose disease, in the contemporary medical sense. What it does do is more meaningful as it shows you how to not become ill in the first place, how you are likely to develop disease if your lifestyle, diet and other influences play into your inherent weaknesses and, if you are ill, shows where to focus treatment to best support your own body's capacity to heal.

Through studying the iris, an Iridologist determines the inherent strength of each body system, current level of toxicity and stress in body tissues and, combined with a thorough understanding of holistic anatomy and physiology, and a detailed case history, identifies the system, organ and gland weakness pattern that manifests as your individual pathway to disease.

This information is used to guide preventative and self healing programs that incorporate education, purification and regeneration and preventative care.

Iridology also provides a uniquely effective way to explore the interior world of body, mind and emotions, along with their dynamic relationships; relationships that are at the core of psychoneuroimmunology. Traditional medicine has long recognised the relationship between emotional and mental states, and physical health and wellbeing. The modern medical model is also beginning to acknowledge mind-body dynamics, prompted by science such as Candace Pert, who discovered the link between emotions and cellular/molecular function.

Iridology can identify emotional and mental tendencies and their physical manifestations as a cohesive whole, so practitioners of holistic medicine are increasingly drawn to this valuable tool for investigating the continuum of client health on all levels.

"My practice is located in Alamo, Texas, in the USA, which is very influenced by Mexican American culture. Many of my clients are Latin American and suffer from illnesses related to poor diet. I integrate Iridology with herbal medicine and educate them about healthy eating habits. Learning about Iridology and Naturopathy in the School of Natural Medicine Iridology online course changed my life and it has helped me to understand and heal myself and others. NATUROPATHY

Online Course

The online Naturopathy course integrates the study of Naturopathy, Healing Diets, Herbal Medicine and Iridology.

Naturopathy is a systemic approach to holistic natural medicine that recognizes that the cause and cure of disease lies within the whole person; physical, mental, emotional and spiritual.

Naturopathy works with natural laws of living through cleansing and health building, with the support of diet, lifestyle, herbal medicine, essential oils, emotional healing, supportive naturopathic therapies for acute and chronic conditions, fasting, healing processes, exercise, breathing, loving thoughts, awareness of relationships, connection with nature and more.

In this course you will discover the value of cause and effect as you learn how to increase health and vitality, and to achieve balance, harmony and well being. Your clients will not only achieve relief of symptoms, they will achieve true independent health, as you educate them in preventative living, longevity and conscious respect in daily life.

In addition to academic study, the Naturopathy studies emphasis experiential self healing, with a focus on understanding and personal experience, rather than rote memorisation, so that each student becomes an authentic guide for others.

Online courses can be studied individually for certification, and are applied in full if at a later date you wish to continue your education to diploma level.

Some countries do require an examination in their own language, for example in Germany there is an examination required for all practitioners who make health recommendations, regardless of your qualifications.
