

Set Up Your Own Agent Website

This personalised version of Inteltravel.uk could be your most powerful avenue for earning travel commissions. Inteltravel.uk equips you with all you need to run a successful travel agency remotely.

Once set up - you can share this website link with friends, family and more - and they can browse hotel and accommodation rates and book independently - just like they would on Booking.com or any other comparison site. This website is essentially a client version of the built in comparison tool within your back office.

All client searches remain anonymous, however If someone books using your site, you will receive an email to let you know a booking has been made and you will receive the commission. Commissions are always received up to 90 days after the booked travel has ended (standard in travel industry). Commission rates for anything booked using your website varies from 6-15%.

Step 1: Log on to your Inteltravel website.

Step 2: Hover on the 'My Agency' menu and click on 'My Agency Website'. This will then take you to the page where you will be able to create your own client facing booking website.

Step 3: All you need is your name and email address to get this set up initially. It can be changed later on if you want to use a brand/travel name for your agency - however the style and format of your website cannot be personalised due to compliance reasons from our host agency (the large number of agents prevents this from being feasible).

TIP: We also highly recommend sharing your website with anyone who wants to book trips and excursions - as **Viator** is embedded into the 'Activities' section - the commission for which is 13%.
