Chad and Chris,

Good chatting today. Please pass this on to the client for their review. If they have no changes they can sign and send back. If there are redlines, we will pass on to legal to consider.

Thanks for connecting with us on the project – I hope we can help move it forward.

Best,
Chet

Hi Catalina,

It looks like Brad is out on extended leave and has tagged you in with his out of office.

We are working on a confidential project of significant scale here in Hermantown. I'd like to introduce DEED to the project lead for the development team, Chris Bates. He is with Mortenson and is copied.

Would it be possible to get on a Teams call, brief DEED on the project, and chat about your programs? I've given them a high level on what I think might be applicable, but it would be good for them to meet you and DEED directly.

- Chad

Hi Catalina,

It looks like Brad is out on extended leave and has tagged you in with his out of office.

We are working on a confidential project of significant scale here in Hermantown. I'd like to introduce DEED to the project lead for the development team, Chris Bates. He is with Mortenson and is copied.

Would it be possible to get on a Teams call, brief DEED on the project, and chat about your

programs? I've given them a high level on what I think might be applicable, but it would be good for them to meet you and DEED directly.

Chris,

Could you confirm at this point whether the project is a data center? If so, I would have another business development manager – Colleen Eddy – be the lead on our end instead of Chet. Colleen focuses in data centers among other industries. Please advise.

Darren,

We'd like to sit down with you and the SLC team for an hour or so to chat about some of our coordinated touch points in Project Loon, maybe Hawkline, etc.

Something in the next couple weeks work for you all?

Chad Ronchetti, Economic Development Director

City of Hermantown

Working together to serve and build our community.

Chad,

We will be sending you our new revised dates rather than a doodle poll likely today. Then with these dates you and David can schedule your conference room as well.

Thanks Darren

Darren Jablonsky, Director
Economic and Community Development

Darren,

Last I heard, someone at the county was going to send a Doodle poll? Would you like me to do that?

Yes we do.

I'll have to get you the specifics. A lot of it is driven by the mechanical designer, but we do have specs. We usually order size based on Mech drawings and we supply the meter. They, the customer, are charged for it based on the size of the meter.

Subject: RE: Project Loon Water/Waste Water RFIs

Got it. Thanks. I get that we buy our water, and as we go deeper into this deal, we'll need to work directly with WLSSD. Would you be able to answer the following questions for me? Maybe by early next week, if possible?

- i. If yes, what were any key system weaknesses or system vulnerabilities identified (can respond abstractly to limit disclosure)?
- ii. What were the mitigation measures identified to address these?
 1. What is the timeline for completion of these measures?
- iii. What were some significant system upgrades addressing risk and resilience identified in the RRA as having been executed since previous Vulnerability Assessment?

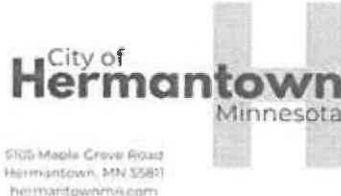

- iv. Did RRA adhere to the AWWA J100-10 Standard for Risk and Resilience Management of Water and Wastewater Systems? If not, what standard was used?
- v. If RRA/ERP have not been completed, what is the time frame to complete it?

Answers might be really simple because of our relationship with the water provider, but I'll take what you've got.

Appreciate your help!

David,

We met with the project team last week, Friday. They are still evaluating the water-cooled option, even if it is a second phase. We are getting them access to Fire Hall #2 for water testing and to a hydrant for flow testing.

Attached are the two RFIs that need to be completed for Project Loon's water assessment. I'm not sure if you've seen these. John had started after them, but when they proposed an air-cooled system, it fizzled out. However, as a part of the due diligence, they asked that we fill these out and return them. We thought it might be best if you were to complete these for us. Can you help us out? After you've done what you can, we can set up a meeting with the project team (Kimley-Horn is their civil/water engineer) to review it.

Understanding you have a lot going on in your life, do you think it achievable to set that review meeting for September 27th? We could review the status of the water modeling with them as well?

Appreciate your help,

- Chad

We met with the project team last week, Friday. They are still evaluating the water-cooled option, even if it is a second phase. We are getting them access to Fire Hall #2 for water testing and to a hydrant for flow testing.

Attached are the two RFIs that need to be completed for Project Loon's water assessment. I'm not sure if you've seen these. John had started after them, but when they proposed an air-cooled system, it fizzled out. However, as a part of the due diligence, they asked that we fill these out and return them. We thought it might be best if you were to complete these for us. Can you help us out? After you've done what you can, we can set up a meeting with the project team (Kimley-Horn is their civil/water engineer) to review it.

Understanding you have a lot going on in your life, do you think it achievable to set that review meeting for September 27th? We could review the status of the water modeling with them as well?

Appreciate your help,

- Chad

Subject: RE: Project Loon Water/Waste Water RFIs

Got it. Thanks. I get that we buy our water, and as we go deeper into this deal, we'll need to work directly with WLSSD. Would you be able to answer the following questions for me? Maybe by early next week, if possible?

- i. If yes, what were any key system weaknesses or system vulnerabilities identified (can respond abstractly to limit disclosure)?
- ii. What were the mitigation measures identified to address these?
 1. What is the timeline for completion of these measures?
- iii. What were some significant system upgrades addressing risk and resilience identified in the RRA as having been executed since previous Vulnerability Assessment?
- iv. Did RRA adhere to the AWWA J100-10 Standard for Risk and Resilience Management of Water and Wastewater Systems? If not, what standard was used?
- v. If RRA/ERP have not been completed, what is the time frame to complete it?

Answers might be really simple because of our relationship with the water provider, but I'll take what you've got.

Appreciate your help!

Paul,

We are responding to a water RFI for a potential project, and one of the questions is as follows:

Has the utility completed a Risk and Resilience Assessment (RRA), and subsequent Emergency Response Plan (ERP) as per American Water Infrastructure Act (2018)?

David Bolf responded with "Public Works can comment on this".

If the answer is yes, I have some follow up questions.

We met with the project team last week, Friday. They are still evaluating the water-cooled option, even if it is a second phase. We are getting them access to Fire Hall #2 for water testing and to a hydrant for flow testing.

Attached are the two RFIs that need to be completed for Project Loon's water assessment. I'm not sure if you've seen these. John had started after them, but when they proposed an air-cooled system, it fizzled out. However, as a part of the due diligence, they asked that we fill these out and return them. We thought it might be best if you were to complete these for us. Can you help us out? After you've done what you can, we can set up a meeting with the project team (Kimley-Horn is their civil/water engineer) to review it.

Understanding you have a lot going on in your life, do you think it achievable to set that review meeting for September 27th? We could review the status of the water modeling with them as well?

Appreciate your help,

- Chad

Thanks, David. I've attached a few comments, mainly around the WTP section. Let me know if you have answers to my comments.

I am going to let the Project Loon team know we anticipate the modeling back by Nov. 1., but would like to exceed that expectation, if possible.

Chad I answered these questions as best I could at this point . I turned on the red tracking of changes, edit as you see fit. The preliminary engineering report and water modeling will help answer the remaining questions.

Paul,

We are responding to a water RFI for a potential project, and one of the questions is as follows:

Has the utility completed a Risk and Resilience Assessment (RRA), and subsequent Emergency Response Plan (ERP) as per American Water Infrastructure Act (2018)?

David Bolf responded with "Public Works can comment on this".

If the answer is yes, I have some follow up questions.

Appreciate your help,

-Chad

David,

Just checking in to see how the meeting went with the SEH modeling person today. We are committed to a Nov 1 delivery for a study to the Project Loon team, but if we can get it sooner, I'll be a lot happier

Also, let me know ASAP if that September 27th deadline for the RFI will work. Happy to work with a delegate if need be due to circumstances.
