

JANDA

Company, Inc.

SERIES 300 ROCKER ARM SPOT WELDER

Built to Last

The Series 300 welders are manufactured in the USA using the same high quality tradition that JANDA customers have come to expect since 1960.

Ready to Ship

Standard specifications:

- KVA rating 30
- Secondary voltage 1 to 5 volts
- Max. secondary amp 17,000

Versatile Product

The Series 300 offers great versatility for a wide variety of spot welding applications, satisfying all the requirements of light - medium duty industrial applications.

FEATURES

- Welded Steel Frame
- Equipped with JANDA's J800-3BH welding control
- 180 amp SCR contactor with 15% to 100% heat control
- Stacked core, dual voltage 220/440 water cooled transformer
- Swivel type lower arm casting has 10" vertical adjustment
- In-Out adjustment on upper & lower arms
- Barrel lock arm & holder clamping
- 2" diameter arms with 1" diameter water cooled electrode holder and #2 mt electrodes
- Complete secondary, arms, castings and holders are copper (not brass)
- J.I.C. air system
- Two stage foot switch
- Retraction (optional)
