

Spiritual and Universal Laws

It is important to understand universal and spiritual law and how to work with energy, frequency and vibration, as everything in the universe moves and vibrates at different frequencies. Understanding this universal law is key to understanding the flow of energy, as this is how information flows to us from spirit. I will also share with you issues that can happen when delivering messages, and how to work through them.

As we start to discuss the connection with spirit, it would be helpful to understand energy, frequency, and vibration. If you understand the process and properties that govern the universe, the connection will be easier for you, as you understand the forces of the universe. Nikola Tesla said, “If you want to find the secrets of the universe, think in terms of energy, frequency and vibration.” As a medium, we work with all three properties, and we work with them naturally. These three properties are the secret to healing, divine connection, and understanding everything that exists on this planet. I won’t go into the properties from a scientific perspective, but I will explain how we use all three in mediumship.

The law of the universe states that everything in the universe moves and vibrates. Everything vibrates at one speed or another. Nothing ever rests. Everything you see around you is vibrating at one frequency or another, and so are you.

The higher the frequency, the lighter you feel in your physical body, as well as emotionally and mentally. You feel you have more clarity. By the same token, love is a vibration. Love is at the highest vibration and frequency. When we connect with spirit, we want to connect with the love vibration, which is where we become connected. The vibratory frequencies also manifest in sound and color. When practicing, or when we sit in a development circle with others, many times people can see the connection of others to spirit, as you can see color around the body and the color radiates upward and away from the body.

Universal Laws

Here is the list of the universal laws and below are spiritual principles to start to develop your spiritual practice.

The Law of Divine Oneness - everything is connected to everything else. What we think, say, do and believe will have a corresponding effect on others and the universe around us.

Law of Vibration - Everything in the Universe moves, vibrates and travels in circular patterns, the same principles of vibration in the physical world apply to our thoughts, feelings, desires and wills in the Etheric world. Each sound, thing, and even thought has its own vibrational frequency, unique unto itself.

Law of Action - Must be employed in order for us to manifest things on earth. We must engage in actions that supports our thoughts dreams, emotions and words

Law of Correspondence - This Universal Law states that the principles or laws of physics that explain the physical world energy, Light, vibration, and motion have their corresponding principles in the etheric or universe "As above, so below"

Law of Cause and Effect - Nothing happens by chance or outside the Universal Laws.. Every Action(including thought) has a reaction or consequence "We reap what we sow"

Law of Compensation- The Universal Law is the Law of Cause and effect applied to blessings and abundance that are provided for us. The visible effects of our deeds are given to us in gifts, money, inheritances, friendships and blessings.

Law of Attraction - Demonstrates how we create the things, events and people that come into our lives Our thoughts, feelings, words, and actions produce energies which, in turn attract like energies. Negative energies attract negative energies and positive energies attract positive energies.

The Law of Perpetual Transmutation of Energy - All persons have within them the power to change the conditions of their lives. Higher vibrations consume and transform lower ones; thus, each of us can change the energies in our lives by understanding the Universal Laws and applying the principles in such a way as to effect change

Law of Relativity - Each person will receive as series of problems (Tests of Initiation/Lessons) for the purpose of strengthening the light within each of these tests/lessons to be a challenge and remain connected to our hearts when proceeding to solve the problems. This law also teaches us to compare our problems to others problem into its proper perspective. No matter how bad we perceive our situation to be, There is always someone who is in a worse position. Its all relative.

Law of Polarity - Everything is on a continuum and has and opposite. We can suppress and transform undesirable thoughts by concentrating on the opposite pole. It is the law of mental vibrations.

Law of Rhythm - Everything vibrates and moves to certain rhythms.. These rhythms establish seasons, cycles, stages of development, and patterns. Each cycle reflects the regularity of God's Universe. Masters know how to rise above negative parts of a cycle by never getting to excited or allowing negative things to penetrate their consciousness.

Law of Gender - The law of gender manifests in all things as masculine and feminine. It is this law that governs what we know as creation. The law of gender manifests in the animal kingdom as sex. This law decrees everything in nature is both male and female. Both are required for life to exist.

Spiritual Principles

- We believe in Infinite Intelligence.
- We believe that the phenomena of Nature, both physical and spiritual, are the expression of Infinite Intelligence.

- We affirm that the correct understanding of such expression and living in accordance therewith, constitute true religion.
- We affirm that the existence and personal identity of the individual continue after the change called death.
- We affirm that communication with the so-called dead is a fact scientifically proven by the phenomena of Spiritualism.
- We affirm the moral responsibility of the individual, and that he makes his own happiness or unhappiness as he obeys or disobeys Nature's physical and spiritual laws.
- We affirm that the doorway to reformation is never closed against any soul, here or hereafter.
- We affirm that the precepts of Prophecy contained in the Bible are scientifically proven by Mediumship.

Physical Mediumship vs. Mental Mediumship

Remember that we work with the natural laws of frequency, vibration, and energy. Spirit does, too. Physical mediumship is when a spirit manipulates energy. To do this, a spirit uses the energy from the psychic medium to create phenomena that can be seen, heard, or felt by everyone present. The spirit uses the medium as a “power source.” It can happen with people who aren't mediums. For example, when we are stressed, suddenly there are raps and taps. This a loved one potentially who wants to say hello and get you to re-focus your energy on something positive, or to let you know that they are there watching over you. Another example of a loved one saying hello is when lights flicker on and off. It's common for spirits to be there during family celebrations. Suddenly, the lights in the room starts to flicker, and in a specific cadence. You might respond and say hello. They flicker even brighter and faster! This is your family member saying hello and letting you know they are around. Instead of freaking out and getting scared, just send love from your heart and let them know you are grateful they are watching over you. It is that simple.

Remember that there is a world beyond this world; we strive to understand and comply with physical, mental, and spiritual laws of nature. Spirit communication between this world and the spirit world by means of mediumship is to bring forth healing, guidance, upliftment, and reassurance. Mental mediumship is pictures, using all of the clairs—your life experiences, visions, symbols, visions, associations, and feelings.
