

# EcoArt

Create art,  
volunteer  
and learn  
with us.

Inspire your group  
to be part of the  
plastic revolution!

Learn about the  
environmental impact of  
plastic waste along with  
innovations solving the  
problem.

# Offering community service beach cleanups and microplastic art projects.

EcoArt

We are reimagining recycling, and advocating for plastic waste solutions through the power of art, education and service. We collect tragic plastics during beach cleanups and utilize them as our primary material for mosaic art pieces.

Hosting a variety of creative workshops in classrooms, retreats, summer camps or in home, EcoArt aims to plant the seeds of a plastic revolution!

# EcoArt

"I'm so happy we got to be part of this project. The kids are still talking about it! Sara really inspired the group and some are even thinking about doing something related to it in the future. They also took some souvenirs back home that they made from plastic they found on the beach. It was the perfect afternoon that I would 100% recommend."

-Alicia, Travel For Teens

## Learn more about our impactful workshops.

The workshop is a 3 hour experience starting at the beach nearest your accommodation.

After a discussion about our collective plastic waste issue and the introduction of new solutions, the group participates in an impactful beach cleanup.

Next, we return to your accommodations or other nearby location and make microplastic mosaics from the rescued beach plastics.

They become the perfect souvenir as a reminder of their Costa Rican experience.

The workshop costs \$30 per participant. EcoArt donates part of the proceeds to The Clean Wave and Playa Grande ADI.
