Purity of form and material

The Entity Side Chair is the most distilled expression of the collection. From the side, the profile reveals a graceful curve where the seat meets the sculpted back. A metal connector bridges the two, inset with woven metal mesh that introduces texture within a clean architectural outline.

Unadorned and contemporary, the armless form allows the materials and proportions to speak for themselves. It is a quiet yet intentional piece—designed to integrate seamlessly while maintaining a strong point of view.
