Dear Dr Scamps

Thank you for your representation of 6 August 2024 on behalf of your constituents, students at the German International School of the Mackellar electorate, about climate change impacts on environment and wildlife.

It's great to see that the students of the German International School are so passionate about climate change and looking after our beautiful planet because I am too. I can assure them that the Government is taking strong action on climate change.

- Passing strong new climate laws to force big polluters to bring down their emissions by 200 million tons by 2030. That's the equivalent of taking two thirds of cars off Australian roads.
- Net zero by 2050 – in law.
- 43 per cent emissions reduction by 2030.
- 82 per cent renewable energy by 2030.
- Cheaper electric cars.
- Higher fuel efficiency standards.
- Huge upgrades to our energy grid so it can take more renewable energy.
- Help for homes and businesses to get off gas and onto electricity.

Thank you again for bringing the concerns of the students from the German International School to my attention.

Yours sincerely
