

How to use this download

- Download the .brushset file to your tablet

Option 1:

- Open the Procreate app
- Click the brush icon on the upper right
- In the brush library, click the + icon
- Navigate to the .brushset file

Option 2:

- Open the file folder where the .brushset file is saved
- Click "open with..." and select Procreate

Use these brushes to add a layer of texture on your background or even on the top of your work!

About the brushes

I created these using photographs that I took on my trip to Jordan. Desert stars is a photography I took of the night sky somewhere in the desert where we camped for the night. The Wadi Musa texture was a photo I took of a floor. And desert flora came from a photo of wild flowers and grasses on a hike.

Psst.

These brushes are the copyright of Alicia Bruce (that's me!). Use them in personal or commercial work, but you may not sell or give away the files.
