

The LifeWave compensation plan offers the best of both worlds in terms of compensation. Most Network Marketing Companies pay out in one of two ways. Either a Binary Plan payout or a Unilevel Plan payout. LifeWave offers a hybrid of both the Binary AND Unilevel Pay Plan. The LifeWave compensation plan is volume-based and does not require any structure to qualify for ranks or payout. Because of these key components, LifeWave offers the most aggressive compensation plan in the network marketing industry.

Now, combine that with the best technology/product, the X39 wearable device, ever launched in direct sales, and you have the most winning combination ever in network marketing.

The LifeWave success pathway is easy to understand when drawn out in both the binary and unilevel diagrams. The first two LifeWave ranks, both 1 and 2 Star Managers, are just volume-based and easy to understand.

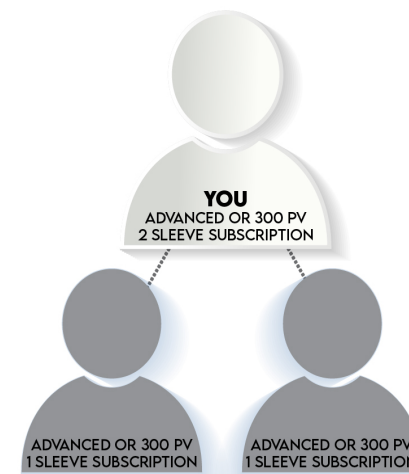

1 Star Manager

Simply come in on an Advanced Package at 300PV or above and place one person right on an Advanced Package at 300PV or above and one person left on an Advanced Package at 300PV or above, and you have achieved the first rank in LifeWave, 1 Star Manager.

LifeWave's Business Launch Bonus kicks in, and you will start receiving \$25 per week up to 9 weeks as long as you continue to build and qualify. Your sponsor will start receiving \$12.50 per week as well when you meet the LifeWave qualification requirements.

One Star Director sets the tone for the rest of the LifeWave ranks to follow. The LifeWave compensation plan is designed with a leadership platform in mind. The better leader you become, the more leaders you create in your organization, and the more in-

come you will generate from your LifeWave business. Every rank, from 1 Star Director to 2 Star Presidential, has to do with creating volume in two legs and a third amount of volume that could come from another leg or a combination of multiple legs. You must have a required amount of personal enrollment volume from both your right and left teams, which is explained in the plan. No structure is required, making all the ranks in the LifeWave Compensation Plan set up as a legacy opportunity.

1 Star Director Diagram shows how the required 5,000 qualified downline volume can be disbursed between two legs that require 1,000 points but cannot exceed 2,500 in volume. The last 1,000 points can come from one or multiple legs. A minimum of 1,000 points must be on either your right or left binary teams.

2 Star Director

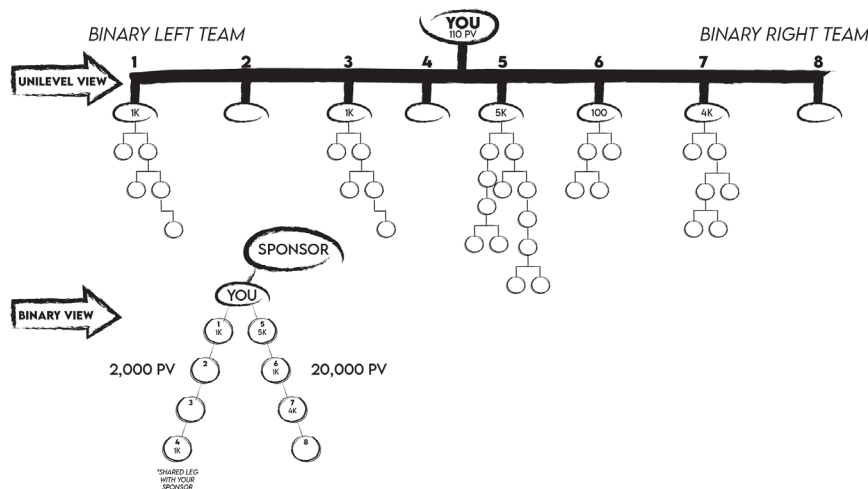

Once you understand and achieve the 1 Star Director Rank, 2 Star Director is just a matter of building depth in the two legs you have established, identifying your next strongest leg, finding the tap root, and continuing to work depth. You must understand the binary balancing requirement of building both your right and left teams.

2 Star Director requires 10,000 qualified downline volume, which can be disbursed between two legs that require 2,000 points but cannot exceed 5,000 in volume. The last 2,000 points can come from one or multiple legs. A minimum of 2,000 points must be on either your right or left binary teams.

What sets the LifeWave Compensation Plan apart from all other company plans is that they do not require building wider by bringing on more personal legs. The key to moving through the ranks and generating more income is by driving depth under 2-3 legs. This creates a solid company and solidifies your business.

3 Star Director requires 20,000 qualified downline volume, which can be disbursed between two legs that require 3,000 points but cannot exceed 10,000 in volume. The last 3,000 points can come from one or multiple legs. A minimum of 3,000 points must be on either your right or left binary teams.
