

brand photography guide

*if you are launching a website,
starting a business or
simply needing a major refresh for your social media,*

YOU CAN'T GO WRONG WITH PROFESSIONAL IMAGES.

We come alongside small business owners and help them create the vision they have for their brand. 2019 is more visual than ever. Customers are looking to your online presence to speak to them. Let us help your vision come to life

q: what types of images will I receive?

Each business is different, so each set of images is different! We have worked with florists, coffee shops, artists, shop owners and all their images are specific to their needs. This is why the initial consultation is so important. It gives us a chance to decide what style will be best for you.

Examples include headshots, flatlays, behind the scenes & action shots

q: I don't really "get" social media, but I know I am supposed to be doing it. will this help me?

Of course! Creating beautiful images is one thing, but we also want to help you implement them into your business. Our packages "grow" and "bold" both include implementation strategy, which will showcase how you can use them on social media to promote your business

are you ready? let's do this!
