<p><b>SCIENCE</b> Animals - Bird Study Biomes - Forest, Desert, Water</p>	<p><b>SCIENCE</b> Plants – Tree identification Microorganisms – Viruses, Bacteria</p>	<p><b>SCIENCE</b> Astronomy Stars, Planets, Galaxies</p>

In addition to liberal arts, there are the common and fine arts as well as the outdoor exposure that enables a full orbbed experience at BCBS. Every subject is approached carefully using the Trivium.

We teach classical drawing, painting, drama, and music. Boys will learn to sing and play music instruments such as classical guitar, recorder, ukelele, and more.

We also teach wood-fired pottery, stitchery, and carpentry. Boys learn the basics before practicing and applying learned principles and techniques.

We also explore God's creation through various field trips relative to what is being learned as well as expose them to a wide array of wilderness excursions designed to inspire and nurture the innate God-given potential in each boy, mind, body, and spirit.
