

JANUARY 29, 2026

GLACIAL LAKES LIVESTOCK, WATERTOWN, SD • 1:00 PM

Selling **30 AGE-ADVANTAGE SIMMENTAL AND SIMANGUS BULLS**

Welcome

We would like to welcome you to our 4th Annual Production Sale. With much anticipation we have been longing for this day to come. 2025 has been quite the ride. We have been striving to grow our program and we have accomplished that. This year we are offering twice as many bulls as we have in the past and I believe greater things are yet to come! This will be our inaugural "live" sale and with that we have made changes. We have moved the sale date to January to help accommodate our customers.

This set of bulls has been a fun group to watch grow. They have been developed slowly and are gaining very well. Phenotypically these are the best set of bulls we have offered to date. With our program we strive to produce seedstock that sets itself apart from the rest. For the cattle feeder, with our high marbling you can rest assured for more prime grading cattle at your harvest with our genetics. For the cow/calf producer that retains females you will get the superb carcass quality and also the maternal genetics. High stability, docility, udder, and feet quality have been built in through our selection process of our females. Each of our females have nearly perfect udders and high fertility which pass along in their progeny. We are very excited to see our first progenies sold from sire and donor both carrying the TRIF prefix.

As usual, we extend a warm invite for anyone to come to the ranch and view the bulls. We would love to show you around and have you evaluate the cattle for yourself. We are excited to meet up with everyone in the upcoming sale season. As always, we look forward to meeting new people as well as visiting with old friends. We are excited to share this set of bulls at our live auction this year and hope to see you there!

May God bless,
Trifecta Cattle Co.

Cody and Brittany Kenyon with daughters
Bailey, Rein and Skye

Jim and Camille Nickeson

Tom Marty and Lana Grefsrud

THE TRIFECTA CATTLE CO. STORY

The Trifecta story began long before the partnership was officially formed. After working with high-grading Red Wagyu since 2011, the search began for Simmental cattle that could match that same level of carcass quality and Prime-grading ability. With careful study of the data and attention to breed-leading EPDs, it became clear that there were Simmentals capable of achieving that standard. That vision led to the creation of Trifecta Cattle Co. in 2020, founded by Cody Kenyon of Clear Lake, South Dakota, Tom Marty of Pelican Rapids, Minnesota, and Jim Nickeson of Flandreau, South Dakota. Drawing from years of experience with genetics, records, and commercial performance, the team blended their strengths to launch a program focused on Prime-grading Simmentals built for long-term industry success.

SALE REPRESENTATIVES

Tony Heins, *Western Ag Reporter* 701-400-4435
Kirby Goettsch, Lee Agri Media 605-380-3939

REGISTRATION AND UPDATED EPDS

All cattle will be registered in the American Simmental Association. All EPDs are the most current BOLT at the time of printing conducted by IGS and the American Simmental Association. Please note that EPDs may change from the time the sale book is printed until registration papers are transferred.

RETAINED SEMEN INTEREST

Bulls selling under \$20,000 50% retained semen interest
Bulls selling \$20,001 to 39,999 33% retained semen interest
Over \$40,000 25% retained semen interest

TERMS AND CONDITIONS

All animals are selling under the terms and conditions provided by the American Simmental Association. All potential accidents occurred at the Livestock auction are the responsibility of prospective buyers.

FEEDING AND BOARDING

Bulls can be boarded until March 1, 2026 free of charge. \$4/day after March 1, 2026 until delivery. The bulls will be kept and fed with our own bulls and treated the same. Successful buyers are responsible if an animal is sick or injured after purchase. We strongly encourage you to purchase mortality insurance.

TRIFECTA BULL GUARANTEE

All bulls have passed a breeding soundness exam prior to the sale. Bulls selling for over \$5,000 dollars, will include a two-breeding season guarantee. Breeding season is defined as a 90-day period from bull turn-in to take-out. All bulls will be prorated 50% of purchase price after completion of the first successful breeding season.

Our warranty for the bulls includes semen and feet issues (not stemming from injury or management) for the first two breeding seasons. All other injuries such as broke penis, foot rot, acts of God, and situations related to management that are beyond our control will not be covered. A veterinary inspection/report is required for warranty claims.

We understand the investment you make in your bulls can be significant; we will make every effort to take care of you if something goes awry.

Warranties will be settled as sale credit, less the salvage value of the bull. In some cases, if a mutually agreed-upon replacement bull is available, the warranty may be settled in this manner.

ANNOUNCEMENTS

All Announcements from the sale block take precedence over printed material.

SEMEN TEST

All bulls have been tested and successfully passed a BSE in January of 2026 unless otherwise noted. Health papers will be provided sale day.

There are several important and logical reasons why commercial customers should consider purchasing bulls with a few more months of age and development on their side. Some of the benefits are obvious, but some others we don't always consider.

- Older bulls have the ability to service more females in a shorter period of time than yearling bulls. Age advantaged, 18-20 month old bulls should be capable of safely settling at least 5-10 more females in their first breeding season with minimal risk over a 45 day breeding period due to greater fitness, superior average semen production and maturity.
- Over-fat bulls are an issue in this industry. A high quality, slower paced development program is possible when producing older bulls for sale. Age advantaged bulls can simply be developed more slowly and still reach target weights and marketable condition with ease. Too often bulls developed to be sold as yearlings are subjected to extra push nutritionally in order to make those same thresholds. When done improperly, the results can be reduced longevity and lifetime service because of damage to feet, soft skeletal tissues and in extreme cases even internal organs associated with excess or faulty nutrition and exaggerated growth rate.
- Certainly, older bulls lose less weight and strength during their first breeding seasons. With that in mind the risk of your bull taking a week off or quitting the process of breeding cows completely is reduced. This is especially true in the more challenging breeding environments of the southern US.
- More of the guess work is taken out when purchasing older bulls. Strengths and flaws can both be more evident to buyers with an extra 6 months of development. For example, by that age foot and leg or disposition issues will be more evident and a higher percentage of potential problem bulls should have been identified and removed from the offering.
- Sorting older bulls does not give license to buy poorer genetics just because they have more age. It is important to make sure the age advantaged bulls you are evaluating are not just the leftovers after the more valuable bulls were not marketed as yearlings and low genetic value bulls should never be an option, regardless of age.

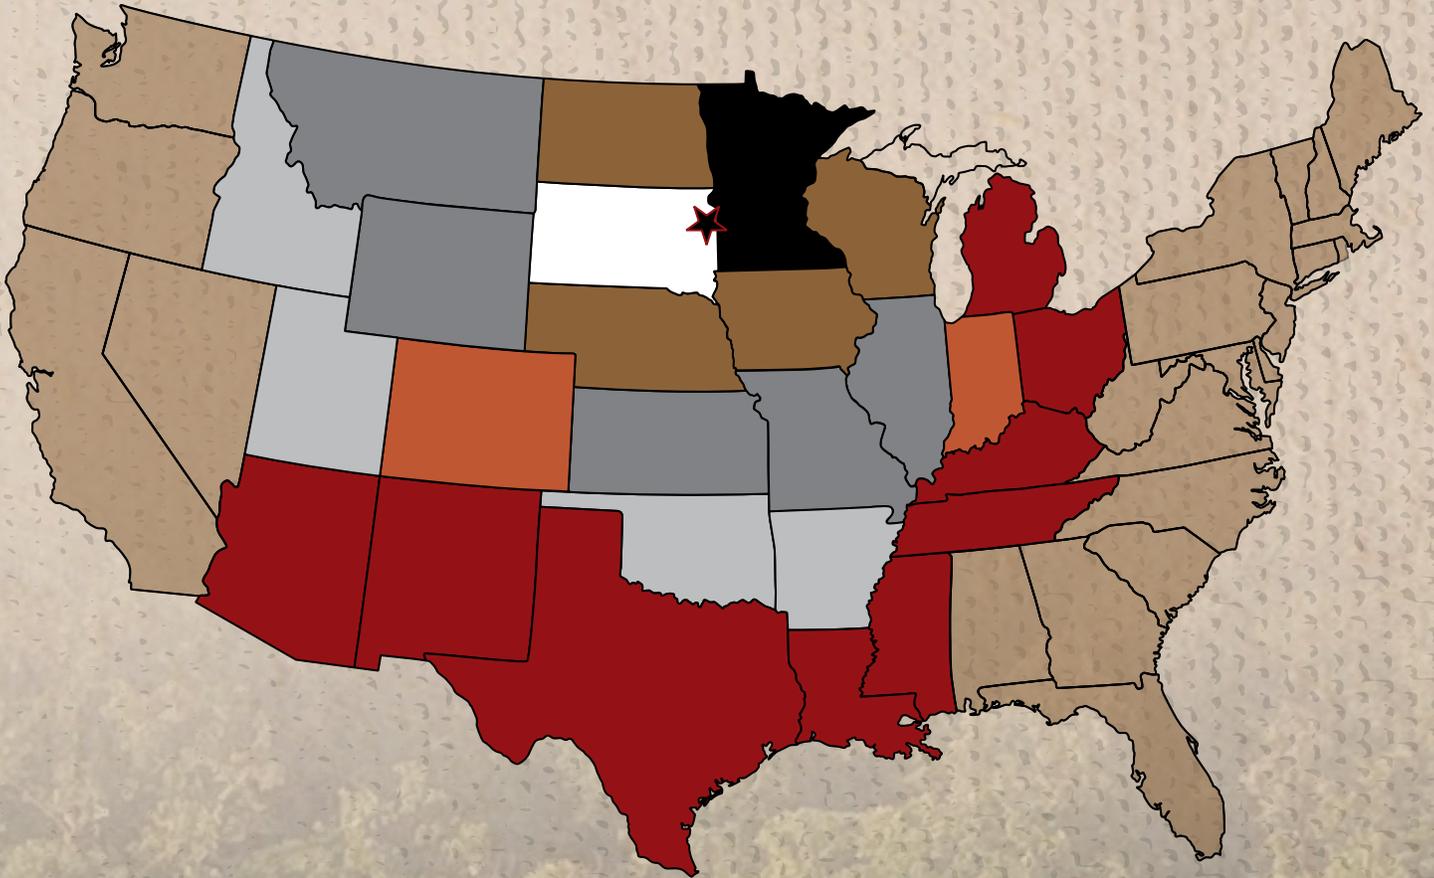

Many producers will always favor purchasing high-value, younger bulls because of the potential of an extra season of use later in life and often sellers prefer the simplicity and lower cost of producing them. Correctly developed older bulls however, simply have a greater probability of breeding success in the first season than when they were younger. Give them a try for reduced risk.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

From the Sale Manager

Welcome to the 2026 Trifecta Cattle Company Bull Sale! We are privileged to work with all the parties involved in Trifecta Cattle Company, and are firm believers in the products they produce for commercial cattlemen. All the bulls come in an age advantage package, developed with longevity in mind, and will supply incredible genetic value.

The offering in terms of genetic advancement will be rivaled by few across the country. The profit indexes in terms of API and TI rank amongst some of the highest in the IGS multi-breed genetic evaluation. Top-tier carcass traits in both REA and marbling, combined with superior maternal traits, can be found from cover to cover. The commitment to genetic advancement by mass multiplying the best cow families the Simmental breed has to offer has allowed Trifecta Cattle Company to move forward at a rapid pace. Progeny out of CLRS Genome, KBHR Sugar Crush, and JLN Astoria are some of the finest genetics buyers will have the chance of purchasing.

We hope that you can join us on January 29th in Watertown, South Dakota. The format has changed from years past and we will be selling under a live auction. If you can not be with us sale day, please plan on joining us online on DV Auction.com. As always, if we can be of any assistance, please do not hesitate to reach out to us.

Sincerely, *Marty Ropp, Corey Wilkins and Jared Murnin*

Forge is a bull we chose to sample in our fall breeding program and has successfully frozen semen this past fall. The bull is the target we are striving to produce. He displays wonderful type and structure and is balanced with superior genetic excellence. His combination of marbling and REA places him at the forefront of the American Simmental. His type and genetic excellence, he displays makes him a bull that can move the industry ahead.

JLN GENESIS 436M Sells as Lot 2.

Another powerful herdsire that comes from the Genesis X Genome flush. He is an absolute brute to study in person and comes with added dimension over his top and stoutness from behind. His combination of growth, marbling and REA makes him a prime candidate to produce superior carcasses that will command a premium on marketing day.

LBR GENESIS G69 Sire of Lots 1-4.

Another brute of a bull who comes from the CLRS Genome donor dam. He comes with a bit more stretch and length and still reads with superior carcass figures and strong maternal predictors. You're not going to find four full brothers who study with this kind of genetic value this spring.

EFFECT OF SIRE BREED ON SALE PRICE OF BEEF STEER CALVES

Superior Livestock Auction, Summer 2020^c

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale time** than all other calves.^b

It's no wonder the percentage of **SimAngus™** calves marketed through the industry's largest video auction has grown **eightfold** since 2010.

Want low-risk, high-potential calves with earning potential?

STAND STRONG SIMMENTAL

406-587-4531 • simmental.org

^a For lots of 50 head or more. ^b Kansas State University, December 2020, Superior Livestock Auction data analysis of 3,280 lots, 394,900 head of beef calves marketed during summer 2020. (P<.0001)
^c Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data.
^{d, e, f} Means without a common superscript differ (P<0.05) Lots of calves in breed-identified groups were sired by bulls from the respective breeds and out of dams with no Brahman influence.
