DENTAL & ORTHODONTICS

In order to serve you properly, we will require the following information. All information is strictly confidential. (Please Fill out Completely)

Patient's Name: \_\_\_\_\_  
Last First MI

Social Security: \_\_\_\_\_ Sex: ( M ) ( F ) Date of Birth: \_\_\_\_\_  
MM/DD/YYYY

Reason for todays visit? \_\_\_\_\_

Please indicate who you would like to see: \_\_\_Dentist \_\_\_Orthodontist \_\_\_Both

How did you hear about our office(Circle all that apply)?

Google, Yelp, Instagram, Facebook, Youtube, Pinterest, Friend, Family, Insurance carrier

Did anyone specifically refer you? (Yes/No) Name of referral: \_\_\_\_\_

**Responsible Party Information:**

Name: \_\_\_\_\_ Marital Status: \_\_\_\_\_  
Last First MI

Address: \_\_\_\_\_ APT# \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip Code: \_\_\_\_\_

Ph: \_\_\_\_\_ Email: \_\_\_\_\_ Work: \_\_\_\_\_

Date of Birth: \_\_\_\_\_ Relationship to Patient: \_\_\_\_\_  
MM/DD/YYYY

**Insurance Information:**

Name of the primary account holder: \_\_\_\_\_

Relationship to the subscriber? \_\_\_ Self \_\_\_Spouse \_\_\_Child

Name of the insurance company: \_\_\_\_\_ Employer Name: \_\_\_\_\_

Subscriber/Member I.D.: \_\_\_\_\_ D.O.B. of Account Holder: \_\_\_\_\_

Insurance phone number: \_\_\_\_\_ Group number: \_\_\_\_\_

Policy holders name for **secondary insurance** (if applicable): \_\_\_\_\_

Relationship to the subscriber? \_\_\_ Self \_\_\_Spouse \_\_\_Child

Name of the insurance company: \_\_\_\_\_ Employer Name: \_\_\_\_\_

Subscriber/Member I.D.: \_\_\_\_\_ D.O.B. of Account Holder: \_\_\_\_\_

Insurance phone number: \_\_\_\_\_ Group number: \_\_\_\_\_

Emergency Contact Name: \_\_\_\_\_ Ph: \_\_\_\_\_

## MEDICAL HISTORY

List all medications/vitamins/supplements that you are now taking:

---

---

---

Are you allergic to any of the following?

Y N

Anesthetic

Aspirin

Codeine

Ibuprofen

Other: \_\_\_\_\_

Y N

Iodine

Latex

Penicillin

Sulfa Drugs

Do you have any of the following medical conditions?

Y N

Asthma

Bleeding Problems

Cancer

Diabetes

Heart Murmur

Heart Trouble

High Blood Pressure

Joint Replacement

Other: \_\_\_\_\_

Y N

Kidney Disease

Liver Disease

Pregnancy

Psychiatric Treatment

Sinus Trouble

Stroke

Ulcers

Rheumatic Fever

Tobacco use? If so, what kind and how much? \_\_\_\_\_

Are you currently seeing a physician? (Yes/No)

Name and address of physician: \_\_\_\_\_

### Dental History

What would you like to change about your smile? (ex: Do you want more white, straight, healthy teeth or veneers?) \_\_\_\_\_

When was the patient's last visit to the dentist? \_\_\_\_\_ Month(s) \_\_\_\_\_ Year(s)

Has the patient ever seen an Orthodontist? (Yes/No) If yes, when was the last visit? \_\_\_\_\_

Is the patient interested in a **Free Orthodontic Consult**? (Yes/No)

When was the patient's last cleaning? \_\_\_\_\_ Month(s) \_\_\_\_\_ Year(s)

Is the patient having any sensitivity towards hot/cold food or drinks? (Yes/No)

Is the patient in pain? (Yes/No)

## FINANCIAL AGREEMENT

### **PAYMENT IS DUE AT THE TIME OF SERVICE UNLESS PRIOR ARRANGEMENTS HAVE BEEN MADE**

It is our policy to have a definite agreement between you, the patient, and this office concerning the payment of the fees for services rendered. If you have any questions regarding the cost of your treatment please ask our front desk for an approximate cost prior to treatment. For convenience, we accept cash, American Express, VISA, MasterCard, Discover, and Care Credit. All emergency dental services or any dental service performed without previous financial arrangements with the office manager must be paid for at the time of service.

### **PATIENTS NOT COVERED BY DENTAL INSURANCE**

Payment is expected when services are rendered. If major dental work is required, it is understood that at least half of the balance will be paid when treatment is started. The remaining balance is due when the treatment is completed. Financial responsibility on the part of each patient will be determined before treatment. Any dental service performed without previous financial arrangement or verified dental insurance must be paid for at the time of service.

### **PATIENTS COVERED BY DENTAL INSURANCE OR IN OFFICE DENTAL PLAN**

It is our policy to have a definite agreement between you, the patient, and this office concerning the payment of the fees for services rendered. If you have any questions regarding the cost of your treatment, please ask our front desk for an approximate cost prior to treatment. For convenience, we accept cash, American Express, VISA, MasterCard, Discover, and Care Credit. All emergency dental services or any dental service performed without previous financial arrangements with the office manager must be paid for at the time of service.

If you have dental insurance, we will be happy to complete the necessary forms for your claim as a courtesy to you. However, your insurance is a contract between you and your insurance company. You are responsible for your entire bill regardless of what your insurance company pays. We are a third party providing the service to you. We require that you be responsible for your co-payment and deductible at the time of service. After insurance has been filed and if benefits have not been received within 60 days from your insurance company, the entire balance becomes the patient's responsibility. A refund will be given when the benefits have been received from the insurance company. The office cannot render services on the assumption your charges will be paid by your insurance company. Any balance exceeding 60 days may have a 10% per annum service charge on the unpaid balance. We charge a \$35 billing charge for any statement sent 90 days after charges were incurred.

In order to hold your appointment time, we require confirmation. If you have not confirmed 24 hours before your appointment, you will be moved off the schedule to allow another patient to take that time. If you confirm an appointment but do not show, we charge a \$35 fee for each missed appointment. If you come to your appointment without confirming, we will try our best to accommodate you, but we cannot guarantee treatment.

I have read and understand the above financial and office policy agreement.

Check below if you **do not allow** Thrive Dental and Orthodontics to use any of my or my children(s) pictures for marketing purposes.

## DENTAL RADIOGRAPHS

### Dental X-rays: An Overview

Everyone's oral health is different, and a visual examination is not enough to tell the dentist everything they need to know during your visit. X-rays, or radiographs, are just as important as regular cleanings and allow the dentist to see between the teeth, inside the teeth, the roots of the teeth, and the bone around the teeth in order to check for any hidden problems not visible to the naked eye. This allows us to detect any issues that may not be causing you pain.

The US Federal Drug Administration (FDA) and American Dental Association (ADA) have set guidelines and regulations for what x-rays to take and how frequently they can be taken. New patients require more x-rays to ensure their mouths are healthy, but as you continue your regular checkups, fewer x-rays are needed at your next visits.

### Dental X-rays: Types of X-Rays Extra-oral Radiographs

These x-rays focus on the jaw and skull. Although the dentist can see the teeth, these x-rays are used to detect cysts, abscesses, masses, and impacted teeth, as well as any problems with the bones in the face, sinuses, temporomandibular joint (TMJ), or jaw joint.

Types of extra-oral x-rays that we may take in our office:

**PANORAMIC:** shows the entire mouth area. Useful for seeing the position of teeth, detecting impacted teeth, and aid in the diagnosis of tumors.

**CEPHALOMETRIC:** shows the entire side of the head. Used to examine the relationship of the teeth to the jaw and patient's profile. Helps orthodontists create a treatment plan.

### Intra-oral X-rays

These are the most common types of x-rays taken in the dental office. These are smaller, detailed x-rays that allow the dentist to check for cavities, see under the edge of fillings and/or crowns, and check the health of the bone and roots of teeth.

Types of intra-oral x-rays that we may take in our office:

**BITEWING:** shows the top part of the tooth and the supporting bone. Used to check between teeth for cavities, determine the fit of a crown, and status of existing fillings.

**PERIAPICAL:** shows the entire tooth and bone below the root. Useful in detecting abnormalities of the roots or bone anchoring a tooth to the jaw.

### Dental X-rays: Radiation

Modern techniques and equipment allow dental offices to minimize the radiation exposure from dental x-rays to almost negligible amounts. This allows us to safely take x-rays on both adults and children. However, to protect you from the low levels of radiation emitted from x-rays, our office uses a lead apron to prevent radiation exposure to your vital organs.

To see how the amount of radiation from dental x-rays compares to other sources, please see the chart below.

|   |                |   |
|---|----------------|---|
| All Radiation Doses are in millisieverts<br>(mSV) | 0.00005        | Sleeping next to someone, for 1 year                |

## HIPAA CONSENT FORM

I understand that I have certain rights to privacy regarding my protected health information. These rights are given to me under the Health Insurance Portability and Accountability Act of 1996 (HIPAA). I understand that by signing this consent I authorize you to use and disclose my protected health information to carry out:

- Treatment (including direct or indirect treatment by other healthcare providers involved in my treatment)
- Obtaining payment from third-party payers (e.g., my insurance company)
- The day-to-day healthcare operations of your practice

I have also been informed of and given the right to review and secure a copy of your Notice of Privacy Practices, which contains a more complete description of the uses and disclosures of my protected health information and my rights under HIPAA. I understand that you reserve the right to change the terms of this notice from time to time and that I may contact you at any time to obtain the most current copy of this notice.

I understand that I have the right to request restrictions on how my protected health information is used and disclosed to carry out treatment, payment, and health care operations, but you are not required to agree to these requested restrictions.

However, if you do agree, you are then bound to comply with this restriction.

I understand that I may revoke this consent, in writing, at any time. However, any use or disclosure that occurred prior to the date I revoke this consent is not affected.

## What to expect at your first visit and the different types of dental cleanings.

I understand that my treatment today may include the following:

- Taking of radiographs (X-rays)
- Recording of periodontal probe depth measurements to check gum health and to assess which type of cleaning is needed.
- Removal of plaque and calculus with a metal instrument and/or ultrasonic scaler
- Coronal polishing
- Oral irrigation of gingival pockets
- Flossing of teeth
- Application of fluoride
- Oral cancer screening and dental exam

The benefits of fluoride are:

- Prevents formation of new cavities
- Remineralizes damaged tooth structure
- Prevents further breakdown of tooth structure in an acidic environment

### Types of Cleanings

Prophylaxis (Prophy) cleaning or healthy mouth cleaning is diagnosed by the doctor when:

- Minimal or no gingival inflammation (gingivitis)
- Minimal or no calculus (plaque present)
- Probing depths are 1-3 mm
- Minimal or no bone loss
- Minimal or no calculus below the gum line.

Deep Cleaning or Scaling and Root Planing (SRP) is diagnosed by the doctor when one or more of the following is/are present:

- Gingivitis is present on many teeth
- Calculus is visibly present above and/or below the gum line.
- Probing depths of 4 mm or greater
- Radiographic bone loss is present on some or all teeth
- Radiographic calculus
- Bleeding when probing

The goals of dental cleanings are to eliminate any further damage to the periodontium (bone, gums, ligaments) that supports the teeth, prevent tooth loss, eliminate harmful toxins/bacteria, remove infection, eliminate bad breath, and restore overall oral and systemic health.
