POST-WEDDING WORKFLOW CHECKLIST

Couple_____

Wedding Date_____

Post-Wedding Week:

- Upload all photos to an external hard drive
- Put backup SD cards into a fireproof safe
- Initial cull of wedding
- 2nd cull: choose blog images and remove too many duplicates
- Upload all to Lightroom
- Edit blog images
- Send wedding to editor
- Blog wedding
- Send out blog email to the couple
- Share wedding on social media
- Send Vendor gallery
- Select portfolio images
- Select gift prints for post-wedding gift & Christmas b&w prints

Two-Three Weeks after Wedding:

- Add editor gallery back to LR
- Check full gallery
- Export full gallery
- Deliver full gallery
- Send Feedback & Review email
- Begin album design process (if an album was ordered)

Notes

- *I store my backup SD cards in my safe until I've delivered the final gallery as an extra precaution.*
- *I use Photomechanic - it is a game-changer for culling!*
- *I use Blogstomp to prep my images for every blog post.*
