Each portrait collection includes a select number of lightly retouched digital files. You'll initially receive all of the images captured, and then you will be able to select your favorites for light retouching. Light retouching includes non-permanent blemish removal and shine minimizing for all subjects in the images, and additional light retouching as needed: removal of bruises or bug bites on arms and legs, removal of photobombers on the beach, etc. Extensive retouching would be available for a nominal charge. Extensive retouching includes, but is not limited to, hair, wrinkle removal, hives, blotchy skin, severe acne, sweat stains, body slimming, goose bumps, tattoos, tan lines, sunburns, head swapping, eye glass glare, and beach debris cleanup. We are able to accommodate most requests, however in the event of very difficult, unusual, or time consuming requests, we might recommend for you to work direct with an online retouching company.

For garden portraits, I recommend mid to late afternoon as garden greenery photographs best with bright sun. I do not recommend evening or dusk portraits because once the sun starts to set the foliage will look too dark. I typically photograph my clients in tree shade with the greenery in the background fully lit by the sun. Shade provides beautiful diffused light which is very flattering for portraits.

For beach portraits, my recommendation is golden hour (the hour prior to sunset) for the most complimentary lighting. The sun is incredibly bright during the middle of the day and many people tend to have difficulty keeping their eyes open, especially small children. During golden hour, we would be able to capture some bright light with white skies in addition to the sunset colors as the sun sets over the water. We would also have approx 5 minutes of afterglow which is the pretty light in the sky once the sun has set.

If you are planning a destination portrait, I recommend scheduling your portrait on your first available day to allow for a backup day. In the event of cancellation due to poor weather, no payment is required.

Portrait images are captured as a full frame image. Due to the standard in the industry for popular enlargement sizes, there will be a slight loss of the image on either side when ordered as an enlargement. I capture the images allowing for this loss of image. 4x6, 8x12, and 20x30 portraits are full frame and there will be no loss of image.

Gallery wraps are canvas portraits mounted on a 1 1/2" stretcher bar, the canvas wraps around the bar, the staples are hidden on the back, and hangs directly on the wall. No framing is necessary.
