

12/2/2010

To whom it may concern,

We have been using **the Vaughan V3P-088 chopper style pump** in our sanitary sumps, **replacing** a Gorman Rupp centrifugal pump. This installation has saved energy and maintenance labor. This pump has run without fail or service call since installation June of 2010. Our goal is to replace all of our Gorman Rupp pumping systems with the chopper style pumps as they fail.

The history behind our decision to replace the Gorman Rupp pump system was due to multiple failures due to plugging, prime, and mechanical failures.
