

ADVANCED NANO PRODUCTS **WORLD WIDE MANUFACTURER**

TALK TO THE COMPANY WITH THE FUTURE IN MIND

DUZA GROUP PRESENTS A FUTURE OF PERFORMANCE

Duza Group provides high performance corrosion and chemical protection. It is engineered using unique nano technology to deliver excellent resistance to a wide range of aggressive environments, chemicals and circumstances.

For product recommendations and technical, application and heat curing information, please contact Duza Group customer service.

DUZA GROUP SERVES A RANGE OF INDUSTRIAL MARKETS

Petroleum & Refining

Duza Group provides superior protection against corrosion throughout petroleum production and refining facilities. Even at elevated temperatures, Duza Group coatings deliver an impermeable lining system that resists chemical and corrosive attacks on refining facilities.

Tank Storage & Terminals

At storage facilities, Duza Group coatings protect tanks against aggressive acids, alkalis, solvents, CPPs, and edible oils, even at elevated temperatures. Because of the non-stick properties they are the preferred system when using bulk storage tanks.

Pipeline

Duza Group coatings are used to line the insides of pipes exposed to corrosive service conditions in oil exploration drilling. Durable Duza Group coatings handle aggressive chemicals and acids, high pressure gasses, high abrasion service, and high temperatures.

DUZA GROUP PROVIDES ENHANCED CORROSION PROTECTION

Truck Transportation

Duza Group provides advanced tank coating protection for road tankers. The nano structure does not allow a chemical cargo to permeate the lining, thus providing corrosion resistance while ensuring product purity and offering highest .

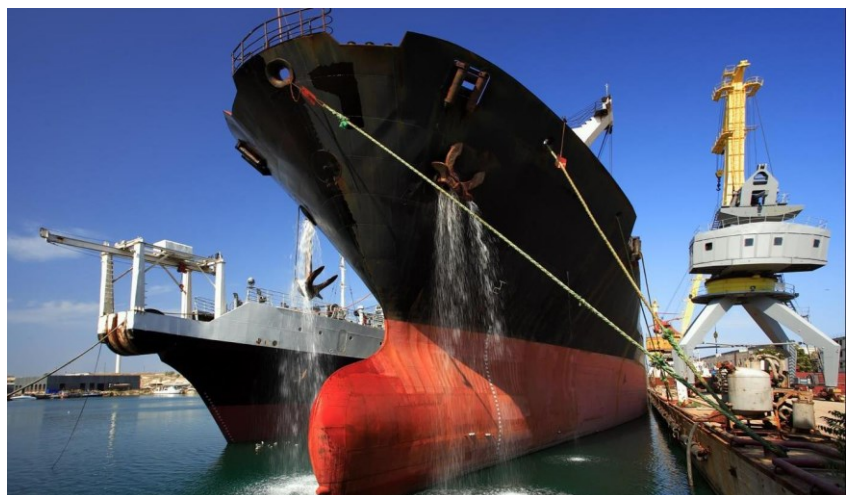

Rail Transportation

Duza Group coatings provide superior chemical resistance for tank and hopper fed cargo. The coating's superior chemical resistance to thousands of chemicals provides lessors with the flexibility to change cargoes after simple cleaning and decontamination, with assurance of cargo purity and quicker down time.

Shipping

Duza Group has the unique ability to supply coatings in the full range for hazardous cargoes, food grades, edible oils, fatty acids, black oils, solvents, inks, acids, caustics and biodiesel fuels.

TALK TO US ABOUT OUR RANGE OF ANTI-FOULING

Duza Group has a range of anti-fouling products based on nano technology that nothing can stick to or grow on. Please contact us regarding our non-stick coatings for pleasure and deep sea shipping.

DUZA GROUP ALREADY SUPPLIES USERS IN MANY ASPECTS OF INDUSTRY

Power Generation

Duza Group can handle aggressive applications at power plants such as flue gas desulphurization systems and scrubbers, stacks, linings, ducts, chimneys, spray towers and fans. Duza Group coatings deliver high chemical resistance and high heat capability > 200°C.

Tank (ISO) Containers

Duza Group coatings offer high performance for tank lining applications including tank containers (ISO tanks), intermediate bulk containers (IBCs), and bulk storage tanks, depending on specific needs of the product tanker container owner or transport manager. With non-stick lining the cleaning and turnaround time is much reduced.

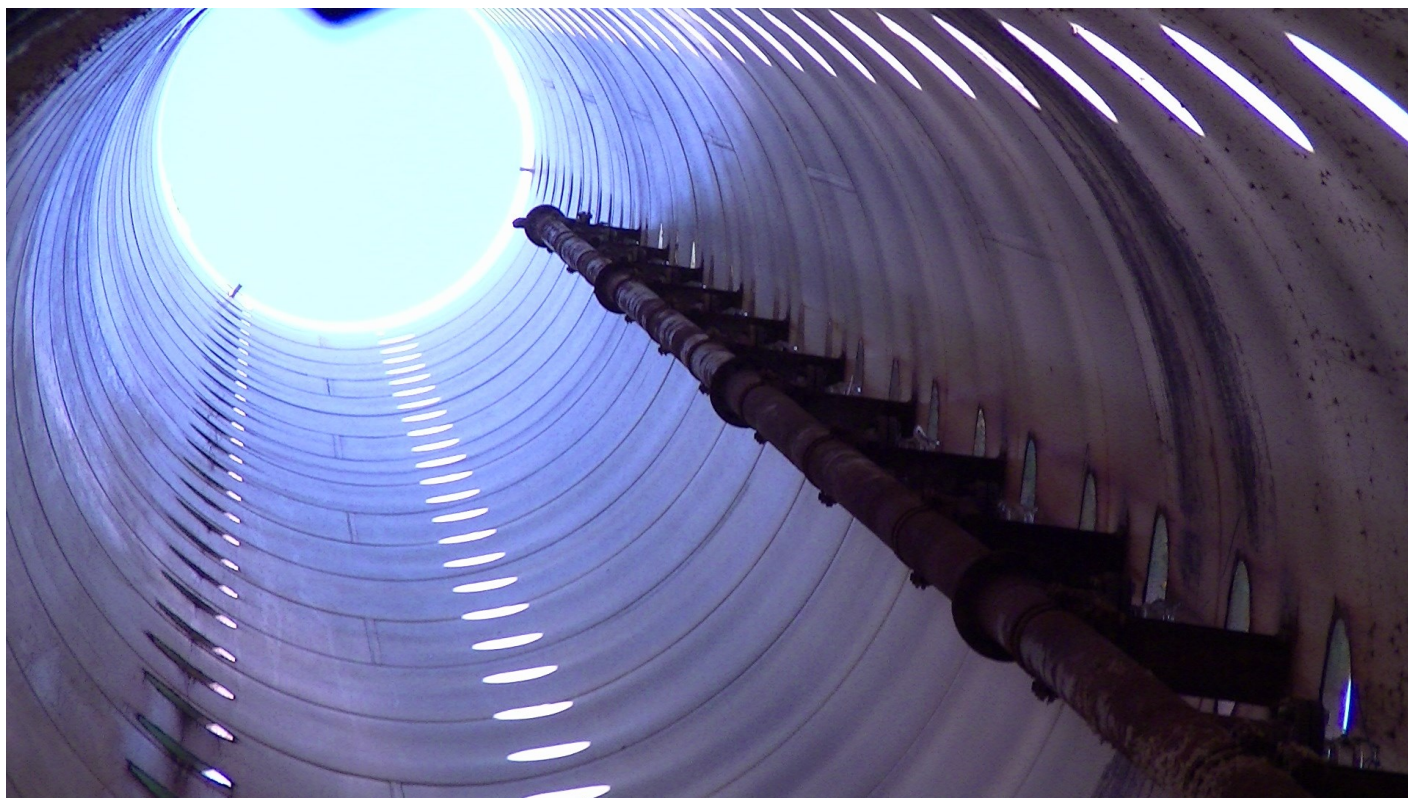

Steel Processing

At steel manufacturers installations, Duza Group offers optimal protection against rust. While nano-protective surface netting promotes paint adhesion. Duza Group offers long-term service.

WHY CHOOSE US?

IT'S SIMPLE

The team at Duza Group is committed to developing unique products for specific applications and markets. Nano technology is the future, so choose a company with the future in mind.
