# Why Render?

---

Our team is honored to create a custom wedding design that is unique to your love story. As a Render Couple, you can feel confident that you will know exactly how your wedding day will look and feel by receiving a custom design deck and personal prototype meeting. Envisioning what your wedding day will look like, even before it arrives, will provide peace and confidence as you walk into your ceremony and reception spaces.

Our past couples rave about the peace of mind they felt in the planning process and their excitement when seeing their design deck (like this one!) come to life. Their loved ones, who attended their wedding, still talk about their floral and decor in how it reflected them as a couple. We deeply understand the personal nature of your wedding day and how it should be a true reflection of your love story. We are thrilled to enter into creating the perfect day for you!
