

Safety Assessors & Testing

To be able to sell your cosmetic products within the UK and E.U, you will need to obtain a Cosmetic Product Safety Report (CPSR), which is also known as a Cosmetic Safety Assessment. These must be compliant to annex 1 of the E.U cosmetic regulation EC1223/2009, and subsequent updates.

The CTPA ([link](#)) has confirmed that BREXIT will not change the UK cosmetic laws and these regulations will still have to be adhered to.

The following list provides information of cosmetic safety assessors that should be able to help you obtain your CPSR. Each assessor has their own pricing scale and may offer bundled packages, so it is important to discuss your requirements with them individually. The process can take anywhere from 2 weeks to several months dependent on your specific products. Also please bear in mind they will have busy seasons like many service industries. Soap School does not endorse any specific person or company and does not accept any liability for the actions of these third parties.

Your CPSR is valid for cosmetics made and sold throughout the UK and the E.U. The assessors may also be able to help with those wishing to import or export from outside these regions but you will need to discuss this with them and they will be able to advise you accordingly with their requirements they will need to proceed.

If you would like to learn how to label your cosmetics and the E.U. compliance required, you may wish to take the **Labelling & Compliance Course offered by Soap School**
