Post-Production Workflow

All wedding collections include wedding day labor, unlimited consultations prior to the wedding, and the following post-production workflow:

Culling of wedding images: Every image taken is viewed and evaluated, outtakes are discarded, and files are organized and sorted chronologically.

*Time estimate: 1 hour per hour of shooting

Editing of wedding images: The RAW images are edited in Lightroom. Images are cropped as needed and color & density enhanced. The edited RAW images are then exported from Lightroom as high resolution JPEGs.

*Time estimate: 2 hours per hour of shooting

Retouching of wedding images: The JPEG images are opened and retouched in Photoshop. For regular collections, light facial retouching (blemish and shine minimizing) is included for the couple in the wedding party, family, and couple portraits. For premium collections, light facial retouching is included for the couple in every image.

*Time estimate: 5 hours per hour of shooting for regular collections, 10 hours per hour of shooting for premium collections

Uploading and archiving of wedding images: After the retouching is completed, the wedding images are archived and then uploaded into the couple's personalized online gallery.

*Time estimate: Archiving of images-1 hour; Gallery setup and uploading-3 hours

Additional Information

Collections cannot be split into two days. A separate collection and contract are required for each day.

Pricing reflects cash or check discount ~ Add 3.2% for US credit cards and 4.5% for international credit cards

50% retainer is due with signed contract to hold wedding date.

Balance is due two weeks prior to wedding.

6% sales tax is required for Florida residents.

Domestic and international travel: \$4000 minimum and travel fees are subject to a custom quote.
