

# SURGILOCK<sup>®</sup>

## POSITIONING FOAM

SurgiLock<sup>®</sup> Positioning Foam is coated with our patented ElasTak<sup>®</sup> adhesive polymer technology to provide an aggressive tack for securing patients. It is imperative that patients and/or patients' limbs to remain stable during surgical procedures. Unwanted movement can lead to injury and other negative outcomes to the patient and undue stress to your staff.

Our patented Elastak<sup>®</sup> adhesive polymer is soy based, environmentally friendly, latex free, and made in the USA. It is also safe for patients with “adhesive” allergy.
