THIS IS PERFECT FOR

Families wanting a lower stress photoshoot; or simply wanting to ease the chaos of having to force smiles. A photoshoot where we not only capture memories but create them.

HOW IT WORKS

Lifestyle shoots consist of up to two hours of shooting where we plan a few activities in advance for your family to do as you normally would and I get to capture all the love in between!

We can get as messy, or stay as clean, as you like (like seriously, those bathtime moments can definitely be on our to-do list). Reading books, dance parties and baking cookies are just some of the many many possibilities.

THIS IS PERFECT FOR

Parents who have a new little member of the family and want to capture the newest connections. Great for families with their first or fifth new addition, I'm here to capture all the bonding!

HOW IT WORKS

Typically my newborn shoots are conducted as a lifestyle type shoot where I capture your connections with your gorgeous baby as they happen naturally.

However I do have a portable studio set-up that I can bring to you to get those more studio style images everyone loves.

My most popular option is a mixture of both but we can discuss your preferences as we go!
