images with space on each page for guests
to sign (use as a guest book) \$350

books & albums

leather bound albums

These professional, high end albums have a thick core between the pages. The pages are made of high quality photographic paper and are custom designed with your images. One (1) page is considered the full spread when the book is open and laid flat, as pictured below. One page generally holds a minimum of 2 images and each half is referred to as a "print". There are several color options for the cover and they can be made with a cut-out window to reveal a photo on the cover. 20-60 images may be selected for the album design and additional pages are limited to 8 images per page.

photo books

Photo books are very similar to albums. The pages lay flat when opened and both are printed on the same, high quality, photographic paper as the photo albums but do not have the foam core between pages.
