wild flower HOLISTIC NUTRITION

Meet Kim - Certified Nutrition & Health Coach

As someone who spent years suffering from severe cystic acne, I was tired of spending so much time, money and energy on short term fixes that were masking my symptoms but not healing the root of the problem.

Changing the way I ate was the only thing that truly cured my acne for good and reduced my inflammation. As amazed as I was by the power of food, I was also overwhelmed by all the online information and endless aisles at health foods stores. This inspired me to go back to school to study nutrition and today I've helped hundreds of clients cut through the clutter and dramatically improve their overall health with a clear plan.

I look forward to supporting you with a personalized plan to heal your skin from within through nutrition and mindful living that works in your real life.

Benefits of Holistic Skin Nutrition Coaching:

Comprehensive Approach - Working beyond topical treatments, Kim will look at your diet, lifestyle, stress levels, sleep patterns, and emotional state to understand the root cause of your skin issues.

Personalized Guidance - Through one on one sessions, Kim will create a customized plan completely tailored to you and your skin health goals.

Long Term Solutions - We'll focus on long-term solutions rather than quick fixes. By addressing underlying imbalances and making sustainable lifestyle changes, you can achieve lasting improvements in your skin health instead of just temporary relief from symptoms.

Book a free 15 minute call with Kim to learn more about how you can work together to transform your skin. Please email the spa at info@wildflowerspa.ca to be sent the link to book!
