PAINT HALF THE CABINETS SKY BLUE.

You don't have to commit to floor-to-ceiling color to get a kitchen that wows. To keep from overpowering the room, Jessica suggests leaving the upper portion white so you can go with a brighter hue below.

PICK A "PILLOW PATTERN" FOR WINDOWS.

Don't let your couch have all the fun! A peppy print at or above eye level makes a statement. "For Roman shades, try a small repeating print that you can still see when they're rolled up," adds Jessica.

USE PUNCHY WALLPAPER BEHIND A BED.

Forget paint. This is the modern approach to an accent wall. For adjacent walls, pick a paint color that's similar in tone to the wallpaper, then stick to accessories that blend in, like a Lucite side table and a brass lamp.
