# COVER PERSONALISATION METHODS

## PRINTING - BLACK OR WHITE

Cover printing is a cutting-edge technique that adds a touch of brilliance and sophistication to your guest book and album covers.

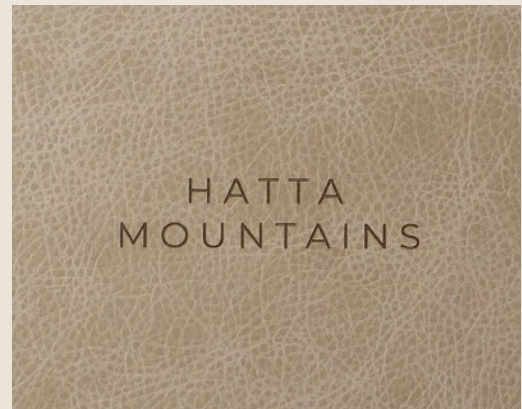

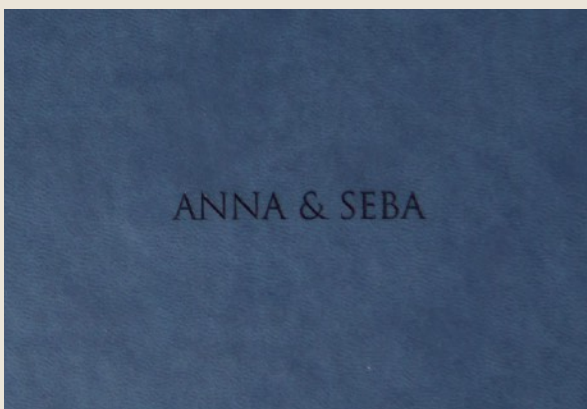

It's a process that involves using UV light to cure specially formulated white or black ink that is applied to the cover material. The result is a stunning, high-definition cover text or motif with intricate detail.

## LASER ENGRAVING

To engrave your text or motif, a highly accurate laser is used to precisely remove the top layer of the material, revealing its natural hues beneath.

Laser engraving is a versatile and durable personalisation technique that can be used on most materials. If you are looking for a way to personalise your guest book or album with a natural finish, then laser engraving is a great option.

## DEBOSSING

Blind debossing is a traditional method of imprinting into a surface without ink or foil. It creates a subtle yet elegant and tactile finish.

The process begins with individually typesetting brass characters or, for custom motifs, a unique brass die is created. The brass is then heated and pressed into the material, creating a depression in the shape of the design. Blind debossing is not available with fabric covers.

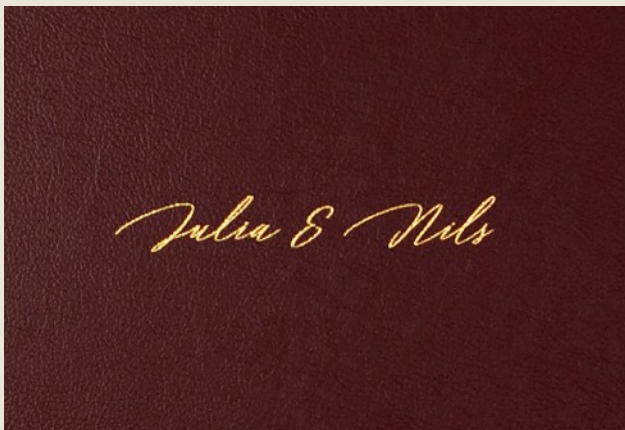

## FOILING - SILVER OR GOLD

Foil debossing involves imprinting metallic foil into a material to create a really eye-catching finish. Like debossing, foiling begins with the meticulous arrangement of individual brass characters. For custom motifs, a custom brass die is made to order. This brass component is then heated and pressed into the material, accompanied by a layer of coloured metallic foil. The result is a striking depression in the material, with a luxurious metallic finish.

## 22-CARAT GOLD OR PALLADIUM COVER FOILING

Sometimes only the real thing will do! Give your guest book or album cover a luxurious touch by using real gold or palladium for your cover text. This is also available in different fonts and covers materials to that of regular foiling, allowing for more flexibility.

22-carat gold or palladium foiling is available in:

- Any leather cover
- A bespoke motif or font
- The following standard fonts: Bebas, Bombshell, Century, Century Gothic, Courier, Futura, Gill Sans, Helvetica, Magarella, Melinda, Montserrat, Prata, Times, Trajan and Univers.

If you'd like something different, most digital fonts are available for printing and engraving. Please let me know in the order form and I will find out if its possible.

## IMPORTANT FONT CONSIDERATIONS

- Bebas and Trajan: Both are all-caps fonts, meaning all letters will appear in uppercase. These fonts are perfect for creating bold, impactful text.
- Bombshell and Magarella: These are script fonts that do not look good in full uppercase, as they are designed for flowing, elegant text. Magarella is particularly fine and may appear more subtle depending on the chosen personalisation method and cover material.
- The fonts available with 22 carat gold or palladium foiling are Bebas, Bombshell, Century, Century Gothic, Courier, Futura, Gill Sans, Helvetica, Magarella, Melinda, Montserrat, Prata, Times, Trajan and Univers.

## BESPOKE MOTIF OR FONT

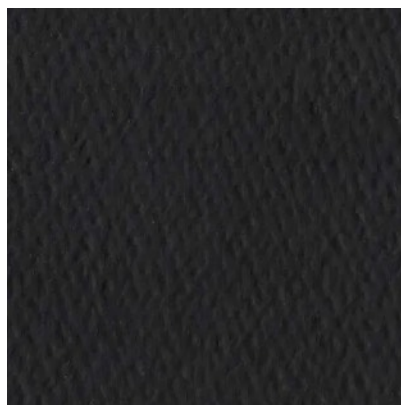

You can opt for a Bespoke Motif instead of standard cover text. This option is great if you have your heart set on a specific font or you have a wedding design used throughout stationary. Please note this will increase the price.

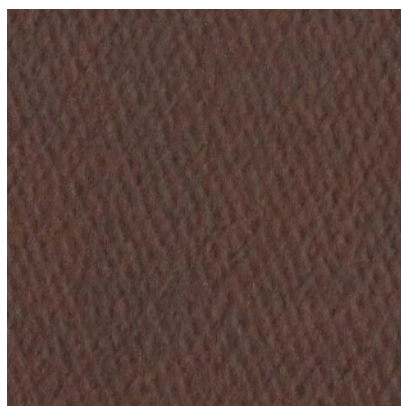

# CHOOSE YOUR END PAPER COLOUR

The end paper connects the cover to the inner paper at the beginning and the end of the book. “Wonderful White” closely matches the inside paper.
