

Tall Pines is proud to announce the inaugural "Conservation Chase", a race event held this May 16th at the Lapham Peak Unit of the Kettle Moraine State Forest!

Building on the **legacy of the Bear Trax & Brownie Shuffle**, this event will feature a variety of walk, run, and ruck options that are open to all ages. Proceeds from the Conservation Chase will support Tall Pines' mission of preserving natural areas, open space, and farmland throughout the Lake Country region and beyond. Participants will not only enjoy the scenic, rolling trails but will also contribute to maintaining the natural beauty of southeastern Wisconsin.

Tall Pines Conservancy is **partnering with Silver Circle Sports Events, LLC** to provide marketing, logistics, timing, and overall event management for the Conservation Chase. Silver Circle Sports Events brings extensive experience in producing high-quality, safe, and professionally managed endurance events throughout Wisconsin.

The inaugural Conservation Chase **celebrates Tall Pines' recent acquisition of the K. Redmond Family Preserve** immediately south of Lapham Peak. This 86-acre acre property features oak woodlands and a sedge meadow where the Ice Age Trail runs along Scuppernong Creek.

The land is now permanently protected thanks to generous donations from the Redmond and Bugbee families. Tall Pines Conservancy invites runners, walkers, and nature enthusiasts to join the Chase and run with a purpose, supporting the vital work of land conservation for future generations.
