I thrive by working with technology and people. I'm a hard worker and a very fast learner. I'm constantly looking for creative solutions, and I enjoy hearing others' ideas. I enjoy handling multiple projects at once. I love learning new things, and I can work efficiently and imaginatively with anyone I meet. I am looking for an in-house graphic design position, taking my career to the next level. I am also able to provide references upon request, and am willing to relocate.
