

LASH LINE ENHANCEMENT AFTERCARE INSTRUCTIONS

Immediately following your appointment, gently blot the area with a Kleenex to remove any excess lymph fluid.

With a clean fingertip or a clean Q-Tip, apply a thin layer of ointment to the lash line or procedure area. Blot away any excess with a Kleenex.

With a clean fingertip or a clean Q-Tip, apply a thin layer of ointment to the lash line or procedure area. Blot away any excess with a Kleenex.

FOLLOWING YOUR APPOINTMENT:

- You may experience swelling, bruising or redness in the eye area.
 - You can apply ice or a cold compress to help soothe the eyes.
- Please keep the eye area clean & dry, no touching of the eye area, especially with dirty fingers!
- Do not pick or remove any flakes or scabs, this will pull the pigment out.
- Keep your showers short and sweet, preferably under 10 minutes so the tattoo doesn't get soggy. This causes scabs to fall off prematurely.
 - No working out, sweating or sun exposure for the first 7 days
- No makeup on the eye area for the first 7 days. Absolutely no mascara!
 - Some light flaking or lightening of color is normal during the healing process.
- Please allow the full recovery period of 4-6 weeks to assess your healed results. Any changes necessary can be addressed at your touch up appointment.
