I am so proud of you for making this first jump into the brave new world you're exploring with your own social impact business and hope this guide will serve you well to better understand why I've come to love the Showit platform and all of the possibilities that go along with it!

To get started, make sure you have purchased a Showit website subscription. You may also start with a 14-day free trial to experiment with the program before going all-in.

Directions for Installing:

1. Create a Showit account or log into your account.
2. In your Account window, select "Add Design to Library" or "Create a New Site". (If you've created a new account, select "Your Designs" then "Add Design to Library").
3. Paste your Share Key Code above into the "Shared Design Key" box.
4. Preview your design and select "Add Now" to add it to your account.
5. Start customizing with your own brand guidelines and add/remove content in any way you see fit! Please note, all images that come with the template are intended for demo purposes only. Make sure you update these photographs before your site goes live.
