EBO2 TREATMENT

3 DAYS AFTER
TREATMENT

Thank you for scheduling an EBO2 treatment with Driip!

Below are a few simple steps that we encourage taking before and after your appointment to ensure your treatment is seamless and effective.

- Begin drinking one gallon of purified water per day to ensure proper hydration and good vein access
- Begin taking 10 grams of EPA/DHA fish oil per day
- For best results, please take Endocalyx 4 twice a day and continue afterwards
- Continue taking any prescribed medications as usual.

Eat a good meal before coming in for your appointment, preferably one with some fat content.

The EBO2 machine re-circulates 5 to 7 liters of your blood over a 45-minute period. The entire procedure is ~90 minutes.

- Rest when your body indicates it's needed
- Sauna use to promote detoxification and elimination of toxins
- Dynamic Detox Formula
- If impaired detoxification and elimination, consider coffee enemas to support these pathways

Note: We require at least 3 days notice to reschedule your EBO2 appointment, otherwise you will be charged 50% of the treatment cost.

To reschedule, please call (612) 516-3772.
