

ROLLER SHADES

Battery-powered roller shades

Battery-powered shades are cost-effective, easy to maintain, and ideal for areas that require a wire-free solution.

Battery basics

Triathlon battery-powered shades use regular store-bought batteries, with battery life dependent on shade size, fabric type, and the number of times the shade is opened and closed every day. That means the shade has the potential to move thousands of times on a single set of batteries.

The batteries are located within the headrail; simply tip the headrail forward to reveal the battery tray, without taking the shade down.

Shade sizes

Battery-powered roller shades are available in configurations up to 12' wide by 12' tall.
