*i am the proud
owner of Wholemade
Design + Photo*

I've been behind a camera for as long as I can remember; I would say this was my first love! I studied graphic design in college and went on to freelance for 3 years offering logo and brand design while taking on photo clients on the side. I've come full circle and have decided to make photography a priority in my services. That old love never dies!

*i'm a girl mom
and a wife to
my high-school
sweetheart :3*

I strive to capture moments in their entirety. Providing more than just a glimpse into life's milestones. I have a soft spot for capturing the big picture all the way down to the details so you can remember these moments almost entirely. These little moments will tell your story for generations to come.
