Welcome

The idea for this cattle sale was born from many hours of windshield time together with Jen and Adrienne. Sometimes in the same vehicle and sometimes talking while both driving to separate breeding jobs. We saw the need for there to be an all breeds female sale that supported our small to medium cattle breeders in Oregon and even some surrounding states.

After working with the Birkys at the Eugene Auction Yard and finding a great partner, we decided this was the year! We hope to connect buyers looking for good replacement cows with sellers who need a marketplace to highlight their hard work!

Adrienne Lulay is an Independent Beef Sales Representative for Select Sires, as well as a Cattle AI Technician and reproductive consultant through her business Ostara Livestock Services. She raises red and black purebred Simmental cattle in Scio, Oregon. Her focus is on moderate, yet big bodied females that have excellent feet, udders, and temperaments.

Jennifer Mitchell is an Independent Beef Sales Representative for Select Sires. She and her husband Clete own CbarJ Cattle CO in Creswell, Oregon. Together they raise Registered Red Angus cattle with a focus on raising good mama cows. The Mitchell's also raise club calf show stock alongside their son.

Hilda-This Sim Angus heifer comes from one of our foundation females here at the ranch. We do not normally sell these females as they have produced some of our highest selling bull calves over the years. This female is deep and extremely maternal, easy feeding, easy keeper type heifer to add to your herd.

Reba-This Sim Angus heifer is out of an original Gohr Angus Reba that we purchased a few years back. We have kept all of her female offspring as they just don't miss. Very maternal females that breed back quickly, calve without assistance, feed easily and are the types of females you can either AI or bull breed and then leave alone and they will get it done for you.

Impress-This Sim Angus heifer comes out of a Treasure Boomtown Angus female we purchased at a dispersal sale in 2013. Our son showed the dam as a heifer and rolled her into our program after her show career was over. She has produced these types of heifers for us every year since. Thick made heifers with big baby chambers just the way we like them. If you are looking for a replacement heifer that will produce some thick, maternal replacement heifers for you look no further. Breed her Simmental, breed her Angus either way you can't go wrong.
