

Signal Film 150

Product Application:

Signal Film 150 is a full-bodied neutral mineral oil based rust preventative and penetrant lubricant developed for use as a corrosion protectant in automotive and commercial settings. Such as "oil undercoating."

This product utilizes the latest cutting edge technology in water impervious base stocks, rust and corrosion inhibitors and plasticized polymer tackifiers that allows for uniform film thickness and ease of application while leaving a tenacious protective film to any surface applied.

This durable product prevents and in many cases slows and halts oxidizing rust in the harshest of winter climates.

Features and Advantages:

- *Easy to apply
- *Excellent corrosion protection
- *Uniform film thickness
- *Easily cleaned up with warm soapy water or mineral spirits

Theoretical Coverage:

*Average use is 1.0 – 1.5 gallons per average size vehicle.

Package Size:

2.5 gallon containers, 5 gallon pails, 55 gallon drums

Surface Preparation & Application

Surface Preparation:

*Wash area to be coated removing salt, dirt and loose rust and oils

Application:

- *Air operated undercoating equipment
- *Air less spray equipment
- *Brush

Clean up recommendations:

*Easily cleaned up with warm soapy water or mineral spirits

Typical Characteristics:

Specific Gravity @ 60 °F	.89
Flash Point	400 °F
Pour Point	10 °F
Appearance	Amber
Cure Time	1.0 Hour
