BRIGHTER FUTURES TOGETHER

## TIA Orientation 2024

On September 3rd 2024, TIA had its Orientation. We welcomed our students to the 2024-2025 school year. Students came at 10:00AM to the orientation session led by Mr. Bakri. We introduced students to the quadmester system, UGP schedule, Telegram, E-School, school rules, homestay rules, dress code and trip schedule. We also made sure that all students are taking the correct courses for the semester. TIA is committed to making this a happy, healthy, fun, and educational school year!

## STEM Club Begins!

On September 20th, TIA had its first STEM club session for the 2023-2024 school year! Led by our Student Council President Seojin, students came to the STEM club for extra Math and Chemistry help and planned future meetups. The program is designed to help students compete in the Waterloo math and computing contests and optimize their marks for university acceptances.

## BBQ Time Before the Weather Gets Cold!

On September 13th, TIA kicked off the first event of the school year with a barbecue at Huron Park Community Centre! The school brought burgers, hotdogs, salads and chips for everyone to enjoy. Students were able to get some exercise and relax on a beautiful sunny Friday. Staff and students volunteered to cook all the food in the outdoor charcoal grills. Mr. Bakri spoke to students about the upcoming Terry Fox fundraiser and the importance of supporting ongoing cancer research. We look forward to more events throughout the year.

## TIA Bake Sale

On September 19th, TIA had its first Bake Sale! The Bake Sale commemorated the mid-Autumn Festival, and it was the first event totally organized by the Student Council this year. Students made their own moon cakes, rice cakes, and brought in puff pastries and bean cakes. The event was a success! All proceeds went toward Terry Fox cancer research. We look forward to more student-led and philanthropic food sales throughout the school year.

## **QuickSchools School Management Platform Goes Live at TIA**

The school administration now uses QuickSchools, which is an online school management software. This includes an online scheduler, parent portal, report cards, and student profile. Agents and parents can now check out their child's report cards, guidance notes, and attendance record online at any time.
