ARTFUL ECOLOGICAL LANDSCAPES

### Organic Lawn Care – New for 2025

***FINALLY, an environmentally-responsible way to manage your lawn!***

Managing turf in our region is challenging due to our acidic soils and extreme seasonal shifts from hot, humid summers to cold, wet winters. Our organic lawn care program, paired with autonomous mowing, ensures a healthy lawn tailored to your yard's conditions.

Key components of the Backyard Bounty turf care approach:

- Turnkey system that Backyard Bounty manages from start to finish
- Onsite consultation with Backyard Bounty Operations team to determine appropriate setup location
- Weekly technician visits for string trimming, debris clearing, blowing and system check
- Seasonal turf treatments (4 per year) including organic fertilizers, soil amendments, and fall aeration/overseeding as indicated by your soil test
- Available to existing Backyard Bounty Garden Management clients

How it works:

- A boundary wire installed by Backyard Bounty encloses the lawn and contains the mower
- A docking station recharges the mower and is stored offsite during the offseason
- Mower runs at night cutting only fractions of an inch per mow
- Smaller areas (e.g. lawns <400SF) or those unsuitable for auto-mowing will be hand-mown with electric mowers
- Backyard Bounty sets up the system in spring, monitor during the season, and remove and store for winter

NOFA Certified Organic Landscape Services

# BACKYARD BOUNTY

ARTFUL ECOLOGICAL LANDSCAPES

## Benefits

- Quiet, hidden operation
- No gasoline or exhaust fumes
- Full-service approach
- Includes all equipment, services, materials
- Better for turf due to less dramatic cutting and better nutrition

## Requirements:

- Access to electricity
- Access for our teams to monitor and service system during maintenance visits
- System covers up to 2500 SF of lawn; surcharge per additional 1000 SF of lawn
- Willingness to work with Backyard Bounty during this first year to help us learn and improve the program

## Note:

- During the dormant weeks of summer, mowing frequency may be reduced to prevent compaction and injury to lawn
- Additional lawn repairs (including from animal damage), spring seeding, or renovation will incur separate charges

Price: \$2995/year including all equipment, materials and services. Contact us at [gardens@backyardbounty.net](mailto:gardens@backyardbounty.net) to get started.
