A Message from Rachel

Mathematics is what is on my
mind right now!

As the Pilot Program of our CBI
Mathematics Project enters its
second year, the final places
continue to fill. It is truly
awesome to see participants
signing up from far-reaching
parts of the globe—from
Lithuania to Oman, Ghana to
Norway!

If you, your school, or your
organization are considering
moving to a complete, all-
inclusive, Concept-Based
Mathematics curriculum, we are
here to support you.

Don't hesitate to contact us—
we're ready to answer any
questions you might have and
provide the guidance you need.

This has been a true labor of
love, and I'm thrilled to see the
content being used and loved by
so many.

Rachel

Making a difference starts with
challenging ourselves to try something
new.

This academic year, we've embraced
new initiatives because we are
passionate about empowering
learners and fostering deep,
transferable understanding.

As a result, we've seen our beautiful,
passionate global community of over
38,000 members come together to
learn, discuss, debate, and explore
how we can create transformation in
our schools and for our students.

As the school year comes to an end,
we're reflecting on the incredible
journey we've shared with you as a
global community of educators.

Thank you for welcoming us into your
inbox and your life and for allowing us
to share our passion for building a
community and transforming
education together.

We've had an extraordinary year full of
achievements:

- We awarded 55 new CBCI Trainer
Certifications from the Erickson
and Lanning CBCI Institute.
- We completed 13 cohorts of
online courses with over 700
talented and driven participants.
- We hosted 12 Free Global CBCI
Events.
- We hosted our CBI Learning Labs
Conference at UWCSEA Singapore.

WORKING WITH YOU IN 2023/2024

With the new school year
approaching, we are locking in our
future workshop and event dates—
we look forward to sharing them with
you!

***Transforming education starts
with you...***

REGISTER NOW FOR OUR
JUNE MASTERCLASS

Exploring Self-Regulation, Play, and Playful Learning with Dr. Jo Fahey

Our FREE Masterclass this month will be presented by Dr. Jo Fahey and hosted by Rachel French on **June 27th at 07.30 AM UTC.**

This Masterclass is for early childhood educators who want to understand the difference between self-regulation and self-control and find strategies for helping children who become dysregulated.

This 60-minute class will explore:

- THE DIFFERENCE BETWEEN SELF-REGULATION AND SELF-CONTROL.
- THE ROLE OF THE ENVIRONMENT IN PROMOTING SELF-REGULATION.
- THE DIMENSIONS OF PLAY AND PLAYFUL LEARNING.

Unlock the power of a Concept-Based Inquiry approach with Rachel French

Join Rachel French at the International School of Arizona, Scottsdale, USA, **August 5-6, 2024.**

An intensive 2-day workshop for Teachers and School Leaders committed to implementing a Concept-Based approach. This workshop has practical strategies that invite you to rethink the unit design process.

The ISA Difference:

ISA provides every student with an intercultural understanding. Rather than simply "teaching" a language, students learn in that language, resulting in fluency in traditional academics that stay with them throughout their lifetime.

THE ERICKSON & LANNING CBCI INSTITUTE 2024

**PLACES ARE NOW FULL FOR THE
2024 COHORT!**

PLACES ARE NOW FULL FOR THE 2024 COHORT!

This year's selection process has been the most competitive ever. With so many applications, the competition was fierce, and places filled fast!

As a result, we are opening applications early for next year's cohort (beginning August 2025) - so some of you who missed out on this year can secure your place for 2025.

If becoming a certified trainer is something you are considering, we encourage you to act now to avoid disappointment.

The Institute costs €7,490 (or €8000 if paid by a payment plan).

This includes the 12-month program, course materials, certification, and licensing.

If you're planning to seek funding from your school or organization, now is an opportune time to start the process, especially with PD budget planning for next year on the horizon.

Alternatively, if you are planning on self-funding, consider beginning a payment plan now.

We offer these plans to those accepted prior to May 28, 2025.

APPLY NOW FOR 2025

2025-2026

THE ERICKSON AND LANNING CBCI TRAINER CERTIFICATION

BEGINNING ON AUGUST 16TH, 2025

As a certified Erickson and Lanning Concept-Based Curriculum and Instruction (CBCI) Trainer, the opportunities for growth are endless, as are the ways in which you can integrate the certification into your specific career focus.

Whether you plan to lead workshops, coach teachers or utilise the learning in your classroom, by joining an expanding group of thought leaders, focused on transforming education, together... we can change the world.

The Erickson and Lanning CBCI Trainer Certification is a 12-month online program designed to:

- Develop a deep understanding of Concept-Based Curriculum and Instruction so that you can fluently and confidently explain the principles to others.
- Provide you with practice crafting clear generalizations or conceptual understandings so you can confidently lead curriculum design.
- Create opportunities to coach others to write generalizations beyond your area of expertise so you can support both the high school math teachers AND the kindergarten team.
- Deconstruct lessons so that you can design your own learning experiences that empower students to think conceptually.
- Provide you with a bank of resources to create a coherent and logical presentation suited to the needs of your particular audience.

APPLY NOW

THE CONCEPT-BASED INQUIRY

- MATHEMATICS PROJECT -

PILOT PROGRAM

Specifically designed for elementary teachers and schools who want to master a Concept-Based Inquiry approach to mathematics, The CBI Mathematics Project is a full, comprehensive mathematics curriculum that empowers students to become confident problem-solvers within and beyond the classroom.

Does this sound familiar:

- Your school lacks a cohesive mathematics curriculum, so you have to rely on resources you've used in the past, while your students have to bridge the gaps between different teaching approaches
- Your school ditched textbooks in favor of Concept-Based Inquiry, but now it's every teacher for themselves in the creative struggle to create engaging mathematics lessons or find resources online
- Working on your units of inquiry, you've seen the power of using questions to help students build conceptual understanding—but designing conceptual *mathematics* units still feels daunting
- Your budding mathematicians are engaged, but you still feel like their understanding is on shaky foundations, wavering every time you try to build on previous lessons
- Those lightbulb moments that pop up in class—when students really *get it*—are exciting, but you have no idea how to ensure they happen *consistently* in your mathematics classes

A complete mathematics curriculum.
Including:

Full Scope and Sequence
Learning Engagements
Strategy Talks
Stretch and Support options
Pre-assessments
Orientation and onboarding

THE PROGRAM THAT BRINGS MATHEMATICS TO LIFE

- Save yourself hours of planning—we've designed units for you so you can focus on teaching
- Help your students understand mathematics so they can retain and build on previous lessons
- Empower students to see patterns, so they can use mathematics to solve real-world problems
- Experience consistent—almost predictable—aha moments in your mathematics class

THIS IS PERFECT FOR YOU IF...

- You're passionate about Concept-Based Inquiry but don't know where to start with mathematics
- You're ready to shortcut the curriculum design process so you can focus on implementation
- You want students to understand mathematics, so they can apply their learnings in real life
- You want your students to feel confident with the mathematics foundation they need to succeed
- You wish your students would remember what they learn, so you could stop reteaching it
- You want to feel less stressed out and more confident in teaching mathematics

As a pilot educator, you'll be the first in the world to experience our revolutionary approach to mathematics!
